Grants, Credits to Be Extended

U.S. Reverses Stand on Portugal Aid

By Bernard Gwertzman WASHINGTON, Dec. 15 (NYT). -The United States, in a major policy decision, has announced that it will launch an economic aid program for the new government of Portugal as "a positive

demonstration" of "support and confidence in Portugal's future." The action marked a significant shift in Secretary of State Henry Kissinger's own thinking about Portugal. Up to the last two weeks, Mr. Kissinger had been reported by aides to be extremely cautious about aiding Lisbon because of its decision to allow a Communist in the gov-

support for the military-led gov-The New York Times reported

lest month from Lisbon that Portugal was pressing the United States for economic aid as a condition to signing a new agreement on the Azores base, which is such an important link in the airlifting of arms to Israel.

A statement issued Friday by the State Department and by the Portuguese government said that the two countries had agreed "that a positive demonstration of U.S. support would be timely and he'pril'

"With the resources immediately available to it," the statement said, "the U.S. government has offered to begin at once a pro-gram of economic assistance and ecceperation which will address itself to the Portuguese government's high-priority needs in the fields of bousing, agriculture, transportation, public administration, education and health, and in the areas of finance and economy."

It said that the program was in-tended as a pledge "of U.S. government support for Portugual in its effort to construct a free and democratic rociety." The dollar value of the initial

aid, from available funds, will be modest, State Department offi-

The United States will guarantee up to \$20 million in private American loans for construction of new housing, and technical experts in a number of fields will be made available free of charge.

The Export-Import Bank will give "sympathetic consideration" to financing Portuguese imports of U.S. goods, the statement said. Washington also pledged to support Portugual in international bodies, such as the World Bank. and to urge friendly countries to Moreover, the department said

it supported an amendment to the current foreign aid bill proposed by Sen, Edward Kennedy, D., Mass., that allots \$50 million in loans to Portugal and \$5 million more in technical assistance to be divided between Portugal and former African territories.

Mr. Kennedy's amendment was accepted by the Senate last week but was not included in the aid bill approved by the House Wednanday. The fate of the Portuguese amendment is being decided by Senate-House conferees. American officials said that the

sicion to grant aid to Portugal sliculd be interpreted primarily as a political gesture by Washington, which had previously adopted a "walt and see" attitude dent Francisco da Costa Gomes which took over when Gen. An-Spinola

the producer nations," he said.

In a briefing, however a senior

Yamani Says Oil Firm Deals Caused Slump in U.K. Pound

bia's Petroleum Minister, said yesterday that it was the action of American oil companies and not of Arab cil producers that led to a sharp fall in the value of the British pound last week.

Sheikh Yamani said that the American partners in the Ara-bian-American Oil Co. had sold buge amounts" of sterling after they were notified by the Saudi Arabian Finance Ministry that all oll payments in the future, when Saudi Arabia acquires 100-percent control of the company, should be made in dollars.

The quick sale by the American partners of accumulated sterling, which Saudi Arabia had accepted in the past, led to speculation in London that Arab oL-producing countries were withdrawing from sterling, and exchange rates for the pound plummeted in relation to other major currencies.

Sheikh Yamani and oil ministers from other Arab countries who attended the meeting here of the Organization of Petroleum Exporting Countries were unan-imous in declaring that they wanted sterling to remain a stable currency for financial in-

Others Paid in Dollars

The decision by Saudi Arabia to require dollar payment for oil accounts is in line with recent practice in the Persian Gulf. Iran receives all its oil payments in dollars, and the United Arab Emirates and Kuwait receive payment in dollars for all government-owned oil sold either to forducing companies or to third

Sheikh Yamani said that the sterling scare, resulting from a misunderstanding of Saudi Arabla's instructions or speculative trading, indicated the fragility of the international currencies' stability in the absence of an agreement between oil consumers and producers on recycling or investment in consumer countries of oil earnings.

"An agreement on recycling that is good for both consumers and producers is more important than a reduction in oil prices.

Sheikh Yamani said in an inter-

While Mr. Ford and the French

nique, Dec. 15 (IHT).—Presidents Ford and Giscard d'Estaing beid nearly two bours of talks on energy problems today after calling for joint cooperation during toast- at dinner last night.

The two Presidents were reported to be moving toward a compromise compact calling for an international meeting between oil-consuming nations and Areh producers.

A U.S. official said be expected an agreement in principle to be announced at the conclusion of two days of summit talks, but spokemen for both sides would not confirm that any agreement had been reached.

This first meeting between the two men opened in a pronounced spirit of compromise. Mr. Giscard d'Estaing called for compremise in a welcoming speech for Mr. Ford at the airport yesterday and a senior American official spoke of it in a briefing on the presidential plane arriving

Today's meetings began in a luxury botel looking out across the Caribbean to Fort-de-France a few miles away. In addition to the two Presidents, Secretary of State Henry Kissinger, his deputy for national security, Gen: Brent Scowcroft, and French Foreign Minister Jean Sauvagna: gues were present.

Concerted Action In his dinner toast, Mr. Giscard d'Estaing sald that "orl; through concerted action will we be able to find a solution to the problem of rising oil prices." He said that preliminary action could include separate consultations among producers and consumers but that the eventual object should be "at a determined date to prepare a meeting at the same table" of

producers and consumers.

And in his toast, Mr. Ford underlined cooperation among the consumer nations, "The United States is convinced that cooperaconsumer nations mark the surest way to reach understanding with

quite a while now and I hope I will go down in history as one of those prime ministers who did not linger on like an unloved guest," he said,

There are basic issues between the government and African na-tionalists concerning last week's agreement to begin talks on the former British colony's future. One important question is the time and place for a constitutional conference.

Mr. Smith said he would like to see the conference held in Rhodesia in January or February. The black nationalists, now united under the African National Council, want the conference in March or later to enable them to organize African support and consolidate their new unity. They also insist that the con-

ference be held on neutral ground, either in Britain or in another country in Africa. Mr. Smith said: "I can think of no more neutral ground than Rhodesia and I would be surpris-

ed if genuine Rhodesians thought that a conference which would determine the country's future should be held outside. I have to be convinced that we should move away from Rhodesia."

Martinique Has a 4-Day Fete To Mark Its Rise to a Summit

nique, Dec. 15 (IHT),-A fourday departmental holloay throughout this troubled island has been declared to celebrate the coming of the Presidents from the North.

The children are cut of school, the steel bands are playing, the islanders dancing and the cocks fighting during the most significant event for Martimique since Jesephine, a Creola native of this island, made it famous by marrying Napoleon.

The radio here and on the neighboring island of Guadeloupe has been providing live coverage since President Valery Giscard d'Estaing arrived at Fointe-a-Fitre Thursday. Prom hillside rum bars nestled under banana trees and hot downtown stucco cafes, one hears a cacopbony of radio reports: "Giscard is arriv-ing ir Marie Galante . . . Nobel Laureates In U.S. Warn of **UNESCO Boycott**

UNITED NATIONS, N.Y. (WP). -Three U.S. Nobel Prize-winning scientists have warned UN Secretary-General Kurt Waldheim that the exclusion of Israel from UNESCO will lead to a boycott of the organization by Western scientists.

This is a politicization of UNESCO and, therefore, will constitute a grave interference with the freedom of scientific discussion throughout the world, Kenneth Arrow, a Harvard University economist, said Friday.

Dr. Julius Axelrod, a neurobiologist with the National Inetitute of Mental Health in Washington, said he informed Mr. Waldheim that he is resigning from the International Brain Research Organization in London as long as it remains in UNESCO.

The two men, Nobel laureates, as is Hans Bethe, a Cornell University physicist who helped de-velop the atom bomb, said the world scientific organization was gravely damaged by the action of its general conference in Paris on Nov. 20, which barred UNESCO assistance to Israel. The conference also voted to exclude Israel from the regional groupings of UNESCO, a more serious action because it blocked the exchange of scientific in-

FORT - DE - FRANCE, Marti- Giscard" is played to celebrate the great event and the listeners begin to sway with the music.

One would hardly remember that the mayors of both Pointeà-Pitre and Fort-de-F, ance are Communists, that unemployment is near 25 per cent, that 5,000 is:andere emig, ate to metropolitan France annually, that sugar exports are half what they were 10 years ago and that the islands run a 600-million-franc (\$131-million: annual deficit.

One of Mr. Glscard d Estaing's principal intentions during his tour of the islands, which have been French departments since 1845 instead of colonies as they were before, is to defuse the independence movement. The Indépendentistes, as they are called, do not constitute a strong movement, but they have been noisy of late, particularly as the cconomic picture bere has worseneci

Thursday and Friday, as the French President toured the villages of both islands, the opposition made itself beard. In Pointe-à-Pitre, an islander jump-ed on the hood of the presidential Cltroën and spat on the windshield. In Fort-de-Francs on Friday, during the largest turnout ever seen on this island. signs denouncing the French President were mixed in with those saying, "Don't Abandon Us, Giscard."

The Communist mayor of this city, Aimé Cesaire, who is also a deputy in the French National Assembly, left the island for a visit to Trinidad rather than receive the French President. When M. Giscard d'Estaing was turned back from the matrie Frida, by the vast crowds. Mr. Cesaire called him a chicken.

His Promises

For the French President, it has been a visit of premises. He pleased the women by announcing that Social Security payments would now include children born out of wedlock. He announced that electrical power prices, twice what they are in Metropolitan France, would be cut by half, regional autonomy would be established and money pumped in to encourage French industry to come here and keep the population from emigrating to Europe.

An industrial buildup would help the islands to escape the perils of depending on a sugar monoculture at a time when sugar production is falling off Mr. Giscard d'Estaing also prom-

ised to improve integration of the island economies into that of the European Economic Community and to "eliminate the vestiges of colonialism." But French officials rule out

a vote on independence here because, they say, it is not supported by the people. Who, they ask, would pay the deficits if these two islands were independent?

Kissinger Called Responsible for Allende's Ouster

NEW YORK, Dec. 15 (UPI).-Henry Kissinger, over Central Intelligence Agency objections, set in motion a policy that ultimately toppled the Marxist regime of Chilean President Salvador Allende, a former CIA agent has said.

In a copyrighted interview published in the January issue of Penthouse magazine, Victor Marchetti also said that Mr. Kissinger and the U.S. government are morally responsible for Mr. Allende's death. Mr. Marchetti spent 14 years with the CIA and the book, 'The CIA and the Cult of Intelligence," of which he was co-author, wae subjected to CIA censorship before publication. Mr. Marchetti sald that the CIA had spent \$20 million to crevent Mr. Allende from winning in 1964, hut held back—for

"practical" reasons—from trying to remove him once the Marxist was voted into power six years However, the former agent said, "Kissinger felt the other way. The CIA did not dump Allende alone, remember," he said. "There was a very large.

complex, and well-coordinated program that included other elements of government and the business world." In April, the U.S. District

Court in Alexandria, Va. ruled that the Marchetti book could be published if Mr. Marchetti, who left the CIA in 1969, and his coauthor, John Marks, and their publisher deleted 27 items out of the 329 which the government had demanded expunged.

Chirac Is Elected Head of Gaullist Party

By Jonathan C. Randal PARIS Dec. 15 (WP).-Prime Minister Jacques Chirac yesterday took control of the badly split Gaullist party in a move designed to end a comeback by the so-called "barons" who dommated its machinery from 1958 until recently.

In a hastily mounted operation, Alexandre Sanguinetti stepped down as party secretary-general at a stormy Central Committee meeting in favor of Mr. Chirac who was elected by 57 votes to 27 for the "barons" choice, Jacques Legendre. The outcome of the vote brought

accusations of "treason," "strongarm tactics," and "humbug" from the "barons"-such former ministers or prime ministers as Jacques Chaban-Delmas, Maurice Couve de Murville, Michel Debré and Olivier Guichard. · Paid Membership

With paid membership down

from a 1973 high of 235,000 to less than half that number, the Gaullist party was ripe for a takeover.

Its rank and file show little enthusiasm for President Valery Giscard d'Estaing an Independent Republican. In diehard Gaullist eyes Mr. Giscard d'Estaing is considered responsible for the late Gen. Charles de Gaulle's defeat in a 1969 referendum which forced him into retirement.

With only five Gaullists in the

government formed in May, the

that he considered the party as a first non-Gaullist president of the Fifth Republic had made it clear ernment partner.

which have no connection with the defense interests of Greece,"

Renegotiation Bid Seen

Informer sources in Washington last night they believed Greece would seek to renegotiate agreements on U.S. hases in the country because it needed them for lts own security, Reuters said. The sources were commenting on the announcement hy Premier Caramanlis. Although he did not mention

them hy name, Mr. Caramanlis referred to U.S. military hases in Greece, established within the framework of NATO. Greece announced its withdrawal from the military branch of NATO following the resumption of Turkish troop advances in Cyprus after Aug, 14, 1974. The government recently sent a note to NATO calling for an

examination of Greece's position within the alliance. Another note to Washington called for review of the status of American military bases in Greece. There are seven major instal-

Japanese Warned They Face Severe **Economic Trials**

TORYO, Dec. 15 (NYT).— Premier Takeo Miki of Japan warned the Japanese people to-day that they were confronted by unprecedented trials from within and without the country" and asked them to have "courage, wisdom and perseverance" to overcome their difficulties.

In his first policy address since taking office last Monday. the Premier struck a new tone asking for sacrifice instead promising benefits, as his predecessors have for two decades. Mr. Miki, who spoke before the Diet (parliament) and a nationwide television audience, evidently sought to inspire rather than to resssure.

He said: "What this country can rely on is the diligence, the technical skills and the hrains of ita people."

He said that although Japan's troubles are "common to all na-tions in the world, the impact of those problems on Japan is more serious than on other advanced inductrialized nations."

tary in Greece, At least 4,000 military personnel and 6,000 dependents live here because of these bases, an American spokesman said.

Agreement concerning the bases provides for U.S. military personnel to have tax-free shops, to operate an armed forces radio station, to drive tax-free imported cars and to serve prison terms imposed by Greek courts in U.S. detention centers in Greece.

U.S. Bases

The largest American base is an Air Force transport base at Athens sirport. The second biggest American personnel concentration is at Eleusis port near Athens, where six U.S. Sixth Fleet destroyers are based. There is a major Navy communications base near Marathon, north of Athens. Three bases are on Crete. An artillery unit controlling nuclear warheads of tactical missiles operated by the Greek armed forces is in Eleusis and Langada. Caramanlis also spoke Mr.

about the political system he wants to apply after the abolition of the monarchy through last Sunday's referendum. He said he favored parliamentary over presidential democracy. "But we want to reinforce the powers of the executive so that

the state and the government could act speedily and effectively." he said. He pointed out, however, that unlike other parliamentary sys-

tems where the president was a figurehead. I believe in the sensible reinforcing of the president's authority." Parliamentary sources said Mr. Caramanlis is seeking a president who would have almost the

powers of the French presidents and wanted that office for himse'f. Cyprus Travel Limited

NICOSIA, Dec. 15 (Reuters) .-Turkish Cypriots have begun restricting travel hy visitors in Cyprus by declaring the Greekheld ports "closed."

Travelers arriving at these ports, including Limassol and Larnaca will not be allowed into the Turkish sector, according to a decree by the separate Turkish-Cypriot administration.

The government of Cyprus earlier applied the same restrictions to persons arriving at the ports of Kyrenia and Famagusta, occupied by the Turks since the invasion of the island in July.

On Facilities For GIs Cited WASHINGTON, Dec. 15 (AP). -The 300 U.S. military commissaries cost state governments

more than \$44.5 million in lost sales-tax revenues in the year ending July 1, Rep. Les Aspin, D-Wis., said today. Post exchanges, similar to department stores, meant a revenue loss of at least \$60 million, he said, although his staff said that their fiscal year 1974 figures are not yet complete for the PXs.

Afong the 45 states that levy sales taxes, the staff studysimilar to one of a year agoshowed that Virginia lost more than \$4.89 million on commissary food sales of \$163,153,982 that might have been made in super-

California and Texas commissarleis had higher total sales on Rep. Aspin's chart, but the sales taxes did not apply to food. The lost revenue was calculated on 20.8 per cent of total sales, to cover taxed health and beauty aids, household supplies, candy and soft drinks. On that basis, California lost

\$3.57 million in revenues from \$361.1 million in sales, while Texas lost \$1.63 million from \$195.6 mil-

When Established Commissaries for active and

retired military personnel and their families were established when the military was underpaid and when posts were in the boondocks," Rep. Aspin said.
But now, he said, military pay is comparable to nonmilitary

wages, with the lowest ranking serviceman or woman receiving \$6,844.21 a year after basic training, excluding health care and other benefits. A general accounting Office report last year found that the commissiaries were illegal under

federal law when open in areas where food is otherwise available at reasonable prices, he said. Commissary prices, on a national average, work out to be about 21 per cent below retail. The commissaries cost the public about \$100 million a year in di-rect subsidies and another \$400

million in operating costs, Rep.

Aspin said.

Builders Blamed In Tehran Mishap

TEHRAN, Dec. 15 (AP),-Iran's civil aviation head, Hushang Arbabi, told the parliamentary Budget Committee Friday that the foreign builders of Mehrabad Airport were responsible for the recent roof collapse. Nine persons were injured in the collapse and 18 died, the last on Thursday. Mr. Arbabl denied charges that

recent alterations near the main eupport of the roof were responsible for the collapse. He maintained that 'weak steel beams' and erroneous architectural calculations were the cause.

Iran's leading architect, Hushang Deihoun, has said that the recent lobby extension weakened the main pillar which supported the roof for 16 years, since it was completed by British consultants

Détente in Africa May Reopen Long-Closed Zambia-Rhodesia Border

By Dial Torgerson LIVINGSTONE, Zamhia, Dec

15.—The barricades may soon swing open on Victoria Falls Bridge as a tribute to détente in southern Africa, and as a reason for it. Zambia and black in-dependent Africa lie north of the soaring span, and white-dominated Rhodesia and South Africa to the south. The govrnments hate one another's politics hut need one another's trade. Now, with Rhodesia reaching détente with its guerrilla enemies, Zambia is expected to open the closed border. It will be termed a gesture of goodwill. But it will bring Zambia the Rhodesian

propriations bill actually funding the military construction program.

a Senate vote on the Diego Garcia issue within 60 days after the new Congress convenes Jan. 14.

End of Turkish Opium Curbs Raises Flow of Heroin to U.S.

NEW YORK, Dec. 15 (NYT),-A wave of comparatively lowpriced, high-quality heroin is flowing into East Coast cities as major European suppliers release stockpilea of the illegal drug in anticipation of resumed Turkish

U.S. parcotics officials say that, according to informants and foreign law-enforcement agencies, suppliers were hoarding the drug during the Turkish government's two-year ban on the growing of ophum poppies. Now that a crop has been planted for spring harvest, they say, suppliers are dumping their stockpiles here at

reduced prices. The improved supply is already converting new users into addicts, expanding the market for imports, according to officials of the federal Drug Enforcement Administration, the National

Council on Drug Abuse and other . If large quantities of the new try's production controls and enter the international beroin market, the officials said prices will stay low and quality will stay

'Mexican Connection'

Worse still, they added, the resumption of the old "French-Turkish connection" occurs when a new "Mexican connection" has sprung up because of the Turkish production ban. Next year, the officials said, they will have to cope for the first time with two major supply rontes.

The supply is up, the purity is up and almost all the heroin we're seizing now in the East is from Europe," said John Bartels jr., head of the drug enforcement agency. "I'm terrified of what's going to happen next summer."

The two-year decline of imports from Europe, he said, was accom-panied by a "whole new distribu-tion network" on the West Coast and in the Southwest and Middle West, a network distributing highquality "Mexican brown heroin," some of it as pure as 15 per cent. The purity of a typical \$5 bag of European "white" heroin in the East declined from about 8 per cent before the Turkish ban to 1 or 2 per cent at the beginning of last summer. Recent samples show

a purity of 5 per cent to 10 per cent, and bulk prices have drop-ped by one-third to one-half Peter Bourne, a former assistant director of the White House Spe-clal Action Office on Drug Abuse and now a consultant to the foundation - supported National Council on Drug Abuse, said his information also indicated that "everything coming in right now is not new stuff, but stuff somebody put away for years."

Some of the old operations based in New York are going

National Candidates

STONE MOUNTAIN, Ga., Dec 15 (AP).—The imperial wizard of the Ku Klux Klan yesterday called for the Khn to nominate its first candidates for president ond vice-president in 1976. James Venable, addressing a

meeting of about 80 Klan leaders and their families in this Atlanta suburb, recommended the nomination of Dale Reusch, 35, of Lido, Obio, for president and Scott Nelson, 35, of Houston, for Mr. Venable said that the Klan

is "on the move . . . throughout the United States—growing by leaps and bounds."

RENO, Nev., Dec. 15 (AP).-The government said that it will appeal dismissal of conspiracy and stock manipulation charges against reclusive billionaire Howard Hughes and three others.

Bullets Are Said Not to Match

Some Experts Doubt Sirhan Acted Alone

By John M Crewdson

LOS ANGELES, Dec. 15 (NYT). More than six years after the assassination of Sen. Robert Kennedy, a small group of criminologists, public officials and eyewitnesses to the shooting are questioning some of the evidence that led to the conviction of Sirhan Bishara Sirhan a Jordanian immigrant, as the senator's only assailant,

Such doubts, founded mainly on a re-examination of the record of Sirhan's 1989 murder trial and related documents, have begun to spread in recent months from a coterie of assassination "buffs" to political figures, investigators and journalists.

None doubt Sirban's involvement in the attack on Sen. Kennedy; but some question whether the bullets that he fired killed Sen Kennedy and others question whether his bullets hit the sen-

Attention is focused on one of the bullets removed from Sen. Kennedy's body that some say does not appear to match others fired from Sirhan's pistol and on eyewitness testimony that places Sirhan farther from the senator at the time of the shooting than the scientific evidence would in-

Idea Dismissed

Joseph Busch, the Los Angeles County district attorney, dismisses the assertions as based on a mis-reading of the evidence and says that Sen, Kennedy's only assailant was Sirban

The controversy has existed since the Sirhan trial but has intensified since May when a Los Angeles County supervisor, Baxter Ward, held a special hearing at which ballistics experts testified about some anomalies in the bullets recovered from the bodies of Sen. Kennedy and five bystanders who were wounded in the kitchen of the Ambassador Hotel here on the night of June 5, 1968.

Mr. Ward's call for a renewed investigation of the ballistic and other evidence is also taken up in an article in the January issue of Haper's magazine, which goes on sale tomorrow. The article is based on an investigation by two journalists, Betsy Langman and Alexander Cockburn

A separate inquiry is being conducted by Allard Lowenstein, a former congressman from New York, Mr. Lowenstein was expected to disclose some of his findings at a news conference in New York, along with Paul Schrade, a political associate of Sen, Kennedy who was wounded at the hotel.

Although a number of divergent theories purport to resolve the conflicting elements, a common thread runs through most of them-the absence of what some see as conclusive scientific proof that the bullets that struck Sen. Kennedy were fired from a single pistol. Evewitness testimony contradicts some of the findings of Dewayne Wolfer of the Los Angeles Police Department, who was in charge of the technical investigation and who now heads the department's crime

laboratory. One discrepancy is raised by the testimony of several of the 50 or so persons who crowded into the tiny serving pantry off the Ambassador's kitchen as Sen. Kennedy walked through it. None of them placed Sen. Kennedy closer than two feet to Sirhan when he began to fire. Some swore that the two men were separated by as much as eight

But chemical tests conducted by Mr. Wolfer on the senator's jacket, which bore the entry marks of three bullets, showed that they were fired from a weapon held only a few inches

Moreover, the fourth, and fatal, .22-caliber bullet that struck Sen.

Soviet Art Figure In New Dispute

MOSCOW, Dec. 15 (UPI),-KGB political police have ques-tioned art collector Alexander Glazer about alleged speculation in contraband books. Friends said there was a scuffle when police detained him.

Mr. Glazer said on Friday that be had been questioned politely for three bours. He said that the KGB agents told bun that he was free to travel anywhere in the Soviet Union, but he might be needed as a witness in a speculation case involving another

Mr. Glazer, 40, who belped organize a controversial showing of nonconformist art in September and claims to have been harassed since then, was denounced yesterday by a Moscow newspaper for alleged speculation on banned He said KGB officials assured him that their organiza-tion had not instigated the

French Abortion Bill Clears Last Big Test

PARIS. Dec. 15 (Reuters).— The Senate today approved, 182 to 91, a controversial draft law making abortion on demand available during the first 10 weeks of pregnancy.

It was the last serious hurdle

for legalized abortion in the predominantly Roman Catholic country, although minor amend ments will force the bill before the National Assembly on Wednesday and again to the Senate for the last time on Thursday. One Senate amendment requires a woman to consult a social worker before having an abortion. Another limits clinics' and bospitals' abortions to one In four operations.

Kennedy behind the right ear and lodged in his brain was fired fro virtually point-blank range, according to Dr. Thomas Noguchi,

the Los Angeles county coroner.

"The inability of people to re-

late what they see is a frailty of buman nature." Mr. Busch said in a recent interview. But the discrepancy between the testimony and the scientific evidence has given rise to a socalled "second gun" theory, which argues that an unidentified assailant, closely positioned behind Sen. Kennedy and to his right, was responsible for his murder, and not Sirhan, who was indisputably in front of the advancing

senator That theory is buttressed to some extent by Dr. Noguchi's finding that all four of the bullets in the senator's body or those that passed through his clothing entered from the back. And, Mr. Schrade recalled recently, his final recollection before being hit by a slug in the forehead was that Sen. Kennedy was walking in front of him and facing directly ahead.

Move Remembered

Others, however, remembered that Sen. Kennedy had paused and turned to his left to shake hands with one of the kitchen employees just before the shooting began, Dr. Noguchi, who has some doubts about the conclusiveness of the Sirhan investigation, nevertheless said Friday that such a move by Sen Ken-nedy would explain much about the position of the bullet wounds. If Sen. Kennedy had been in profile to Sirhan, the coroner

said, it would not have been "too difficult' for him to have shot

Gen. Haig Takes **NATO Command** In Belgian Rites

CASTEAU, Belgium, Dec. 15.— Gen Alexander Haig jr., a former White House chief of staff, took over from Gen, Andrew Goodpaster today as supreme allied commander of NATO forces.

Gen. Goodpaster, 59, who served five years in the post, is being retired early. In a speech at the modest change-of-command ceremony at NATO military headquarters here today, he said that be had boped, and believed, that the time he would leave would come "just a little later." Gen. Goodpaster was not pres-

ent at te ceremony when Gen. Haig took over from him as the commander of U.S. forces in Europe on Nov. 1 at Stuttgart, The absence was widely interpreted as a snub, but Gen. Goodpaster later denied that a snub was intended and said personal considerations forced his absence,

Gen Haig, 50, whose last com-mand was a brigade, said today in response to questions that he felt he had aufficient experience for the NATO post. He pointed out that he had served in combat zones in Korea and Vietnam. "I don't feel self-conscious," he

sald. "I've seen much battle and I have been shot at," Gen. Haig, who retired from the military in August, 1973, to serve in the White House under

former President Richard Nixon, was returned to active military duty by President Ford to assume the two commands. Some European leaders were reportedly op-posed to his NATO appointment and U.S. congressmen voiced op-position because, they said, the move showed that "politics pays off" for the military.

Métros: Poissonnère à Gare do l'Est. the senator behind the right ear, causing him to go into a bodyspinning position"- thus exposing the right side of his back to subsequent shots from Sirhan's

If correct, that theory would also account for the police conclusion that the builet that struck Mr. Schrade first passed unimpeded through the right shoulder pad of Sen. Kennedy's jacket, from back to froot.

As it developed, there was a

man with a weapon standing be-hind Sen. Kennedy, and to his right, at the moment he was struck. He was Thane Cesar, a pa: t-time security guard stationed in the pantry that evening to keep out the uninvited.

Mr. Cesar told the police that

Sen. Kennedy "bad reached out" at the last moment "and sort of turned to shake hands with somebody."

Guard Pushed Down

When the firing began, he said, he was pushed down by the surg-ing crowd but managed to regain his feet and draw his firearm, which he said was a .38-caliber revolver.

Mr. Cesar said he never fired his pistol that night. But Donald Schulman, at the time an employee of CBS News, later told the police that he had seen one of the security guards present—he did not remember which one—return Sirhan's fire. No one else had a similar recollection and no .38caliber bullets were taken from any of the victims' bodies.

While the number of shots fired and the position of the assailant and his six victims are all subject to the vagaries of witnesses, one discrepancy stands out that does not depend on human recollection. Seven of the eight .22-caliber

bullets fired from Sirhan's cheap revolver were recovered by the colice and were photographed in 1970 by William Harper, a retired Pasadena criminologist whose curiosity about the Sirhan case had been piqued by a book about the rolice department's investigation. According to Mr. Harper, one of the bullets removed from Sen. Kennedy's body does not appear to have been fired from the same pistol as the bullet removed from

one of the other victims. Refiring Requested

Mr. Harper, Dr. Noguchi and others have called for a refiring of the weapon taken from Sirhan as the definitive test of wbether the bullet found in Sen. Ken-nedy's body was actually dis-charged from Sirhan's gun. But Mr. Busch said last week that he would not consent to reopen the Sirban investigation. He referred to a 1971 grand jury

dling of the Sirhan evidence by Los Angeles County officials and he added that a re-examination might not prove conclusive and might thereby fuel speculation Furthermore, he said, the pis-

inquiry that criticized the han-

tol, now in the hands of the county clerk, could have deteriorated during the last few years to the point where a comparison firing would be meaningless.

"The two-gun theory is a fic-titious theory," Mr. Busch said, but we an't stop people from taking things out of context and making them inconsistent with the facts. "There is no question in our

minds that Sirhan Sirhan was the murderer of Robert Kennedy and that be acted alone." He said, "I'm not going to let this kind of speculation be given

credence. It's ghoulish to me."

A Truly Great Journalist

He won a Harvard degree at 20; was a public servant of distinction before 30, and the editor of one of America's greatest newspapers, the New York World-before 40. Yet after so precocious a career, Walter Lippmann continued to write, in books and newspaper columns, for more than 40 years with a clarity and intellectual integrity that made him one of the greatest of the journalists of this century.

"Journalist" is a word of many meanings, encompassing some of the best, as well as some of the most fleeting, literature of an era. As applied to Lippmann, a man of the widest culture as well as acquaintanceship with the ephemera of his long day, both men and events, the term means the application of wisdom, learning and conscience to what is bappening now, and may happen tomorrow. This is apparent in the titles of some of his most important books. He did not write "Morals" or "Politics" as if heor his time-could provide the final eummation on how men govern themselves, or one another. Rather, he called his works "prefaces" -- "A Preface to Morals," "A Preface to Politics."

And while Walter Lippmann was called, disparagingly, a "pundit," he did not hand down his thoughts in his newspaper columns as Holy Writ, or smother them in his own deep knowledge of philosophy and history. His conclusions were clear-cut enough, and forceful; but they were argued with a respect for other opinions that made contesting them a matter of rational debate rather than the exchange of epithets. And in a day when personality in journalism was generally more readily saleable than thought. he did not obtrude himself. His personality was private—a pleasure for those privileged to know it, rather than an instrument of public argument and exploitation.

For the International Herald Trihune. whose parent in New York gave Walter Lippmann, despite his frequent dissents from its own policies, hie public forum after the departure of the New York World, the passing of Mr. Lippmann at 85 is a matter of grief and pride, for an association that intellectually enriched the institution, while giving it the opportunity for a major public

New Hope in Rhodesia

Less than a week after the seeming collapse of a hopeful negotiation, the news out of Rhodesia is again highly encouraging: an agreed cease-fire between Rhodesian forces and African liberation fighters, the release by the white minority regime of all African political prisoners including the two most prominent leaders, and the scheduling of a black-white conference to discuss a new constitution without preconditions.

Clearly Prime Minister Ian Smith and his Rhodesian Front government bave at last begun to decipber the handwriting on the wall in southern Africa. In the absence of an accommodation, escalation of guerrilla war in the north and east was certain A provisional government dominated by a black liberation movement had been installed next door in Mozambique, and even South Africa's white government was pressing the white Rhodesians to negotiate with the African majority and threatening otherwise to withdraw its support.

For their part, accepting the wise counsel of the Presidents of Zambia, Tanzania and Botswana, the African Rhodesian leaders were willing not only to order the cease-fire but to put aside their demands for immediate transfer to majority rule in return for a restoration of their freedom and the opportunity to negotiate for a new constitution. Perhaps most important of all for the future of the country they call Zimbabwe, they agreed to bury bitter differences of long standing and unite their forces under the banner of the moderate African National

A critical question now will be whether Mr. Smith can negotiate realistically for a constitution that will have to contain a timetable for the arrival of majority rule in a country where blacks outnumber whites by 22 to 1. Equally critical is whether the unity finally achieved between the diverse African groups will hold up through a long, taxing negotiation.

If he is serious about negotiating with Africans whom he has treated for 10 years as outlaws and worse, Mr. Smith must stand off vicious assaults from die-hard whites determined to perpetuate minority rule in Rhodesia. And African leaders who stick to a course of moderation and flexibility in the negotiations will always be in danger of attack from impatient revolutionaries.

Yet, an important first step-one that seemed beyond reach even six months agohas been taken. There is credit for all parties: and all now need maximum encouragement to proceed along the only road that offers hope for racial justice and peace in

THE NEW YORK TIMES.

Swords Into Plowshares

are spending \$240 billion a year on "defense" and the two superpowers have been able to agree only to freeze the nuclear arms race at even higher levels than those already attained, an encouraging declaration has been signed in Peru Eight Latin American countries have agreed to limit armaments, to stop buying offensive weapons and to use the money instead for social and economic development.

If the eight carry out their agreement they will indeed have taken that "extraordinary and unprecedented step" to reduce hemisphere tensions, for which they have already heen credited by Assistant Secretary of State William D. Rogers, who observed the signing of the pact. If they can persuade the other Latin American nations-Brazil, above allto adhere to the declaration in a follow-up meeting scheduled for next summer in Venezuela, they will have provided a splendid example for the whole world.

The significance of the agreement is enhanced by the fact that all eight signers-Argentina, Bolivia, Chile, Colombia, Ecuador, Panama, Peru and Venezuela-have fought border wars in the past and some etil claim

At a time when the nations of the world land controlled by their neighbors. Few North Americans recall the War of the Pacific (1879-82) but it remains a vivid event for Peru and Bolivia, which lost it to Chile. And Ecuadorians painfully remember Peru's seizure of 77,000 square miles of territory at the time of World War II

> President Juan Velasco Alvarado of Peru deserves great credit for initiating this effort to halt the arms race in Latin America. His neighbors point out that Gen. Velasco started the competition for sophisticated weapons among Andean nations when he bought French Mirage jet fighters and Soviet tanks, complete with Russian instructors. But there can be no doubt that Peru's military regime now genuinely desires to use the country's resources for its social revolution rather than for costly arms.

> What brought the eight countries to Peru on this occasion was the 150th anniversary of the Battle of Ayachucho, which signaled the end of the Spanish Empire in the Americas. Gen. Velasco could not have hoped for a more constructive result from the cele-

THE NEW YORK TIMES.

International Opinion

After Europe's Summit

On the increasingly urgent and dominant question of energy, the [European] summit was able to do little more than prepare the way for an agreement between President Giscard d'Estaing and President Ford on how the oil consumers should deal with the oil producers. If the Americans agree to the French proposal for a tripartite conference of the rich and the poor oil consumers and the producers, in return for French cooperation with the American-sponsored industrial consumer cartel in the new international energy agency, this will be an advance.

But it will still leave a deep rift between the United States and most of the Europeans, not only the French, about the kind of policy to be pursued over oil prices and the recycling of oil money. One reason why both the British and West Germans want the French to join in the new consumers' group is precisely because they share some of the French misgivings over the whole American approach to the oil crisis. They feel that the Europeans, speaking together and yet staying close to Washington can have a greater influence on the direction of American policy.

good time . . .

(One of Wolter Lippmann's regrets after the collapse of his two fororite New York papers, the World, and the Herald Tribune, was that he never wrote a column for The New York Times. He died agc 85 on Soturday in New York, Here is a column in his own words under his old flag. He said it better than ony of us-James Reston.)

-Lippmann on Fear: From what source come these unmanly fears that prevail among us? This dispairing impotence? What is it that has shaken the nerves of so many? It is the doubt whether there

exists among the people that trust in each other which is the first condition of intelligent leadership. That is the root of the The particular objects which

we debate so angrily are not so important. The fate of the nation does not hang upon any of them. But upon the power of the people to remain united for purposes they respect, upon their capacity to have faith in them-selves and in their objectives. much depends,

It is not the facts of the crisis which we have to fear. They can be endured and dealt with It is demoralization alone that

-On Leadership: The springs of greatness in a public man lie finally in the conviction that he must serve the truth and not opinion that be must do what is right whether or not he is sure to succeed . . . this is the way of greatness. In the supreme moments of history, terms like duty, truth, justice and mercy-which in our torpid hours are tired words-become the measure of decision. We unhappily are acting as if we had forgotten them .

We are trying to be too shrewd, too clever, too calculating, when what the anxious and suffering peoples ery out to us for is that we practice the elemental virtues and adhere to the eternal verities. They alone can guide us through the complications of our days ...

—On the Agony of Change: ("Drift and Mastery." 1914): We are unsettled to the very roots of our being, there isn't a human relation, whether of parent or child, husband and wife, worker and employer, that doesn't move

in a strange situation. We are not used to a complicated civilization, we don't know how to behave when personal conduct and eternal authority have disappeared. There are no precedents to guide us, no wisdom that wasn't meant for a simpler age. We have changed than we know bow to change ourselves ...

-On Cheating: A big change has come into American life, It is not that our behavior is demonstrably worse than it used to be. It may in many respects be con-siderably better...The big change is that we are much more lax in what we think about our conduct

Why is it bad to shrug off the ideal standards of honesty in politics, business, and love? Because it defeats us and frustrates our lives. If we do not harden ourselves by stretching ourselves to reach upward to these not wholly attainable ideals, we slump down and settle into flabbiness and footlessness and boredom . .

It is a mistake to suppose that there is satisfaction and the joy of life in a self-indulgent generation, in one interested primarily in the pursuit of private wealth and private pleasure and private of course . . .

-On Hope: When we ask ourit all, I myself do not despair. It is clear, I think, that moral indifference exists among people who have no purposes beyond their private tastes and wishes, and whims and ambitions. It is not surprising that they are so the right of way over public purposes. This will pass. The nation is growing and changing, and the problems which cannot be ignored are mounting. They will generate public purposes. And when they do generate public pur-

others conform with as a matter

elves what should be done about numerous for they have been living in a decade in which private purposes have had

poses, they will over moral indifference they will overcome the Ford-Giscard Meeting

A Chance to Oil Up An Old Friendship

By C.L. Sulzberger

presidents to hold their private is no argument between Washsummits on midway falands to give the impression that neither is sacrificing face. Thus Nixon and Pompidou met in the Azores. and Iceland. Now Ford takes over with Giscard d'Estaing in Martinique, a French territory off

Cozily equipped for public relations, even including tennis racquets (which Giscard d'Estaing certainly wields more expertly than his colleague), the two have their first chance to get acquainted, even if they are already well briefed on each other's "iewpoints.

They are bound to exchange opinions on the world, on the Middle East and on Leonid Breshney, who has been assiduously courting both of them. And they are bound to review differences between U.S. and Prench policy.

Topic A

But Topic A, inescapably, is oil If they can compromise on how to face the bloc of petrole ily, the Arabs), their basic problem will be settled-and the rest of the European Community will

The lack of French oil-end a painful awareness of France's dependence on other lands for energy—runs counter to France's conception of itself. Since Joan of Arc, this nation has manifested a belief in its special spiritual or cultural role, stemming from total independence.

As NATO developed after World War II, France gradually found it could gain the benefits of alliance without sacrificing its hallowed nationalistic concepts. It withdrew from the pact's milltary commands, knowing it was protected in case of war by the combination of West Germany and Italy to the east, backed by U.S. strategic power.

Emphasis on independence continned even within the European Community which binds together nine nations including France, On many issues above all off-Paris found itself outnumbered eight to one. Yet it managed to impose its will, at least partially, on the rest.

Logical Nation

Nevertheless, this is an essentially logical nation, It knows if the industrial world drowns a flood of petroleum money, "flung about by Arab lands enriched through rising prices, France will be among the first to sink Thus access to enough oil for those who need it and establishment of a new monetary system

DARIS.—It has become recent firm enough to benefit everyone custom for U.S. and French must be assured. On this there

ington and Paris. The French—who are just start. ing to feel its fetid breath-want to avoid a depression as much as anybody. The problem for Ford and Giscard d'Estaing is to

agree on the best means of doing what must be done. A weakness of the French bargaining position is that Europe (above all France) is basically short on energy resources while the United States is relatively

invulnerable to pressure and could soon become autonomous. Nevertheless, the wisest approach by far is to coordinate action—in both petroleum and monetary negotiations—between the United States, Europe and Japan. If there is no agreed joint policy on purchases and allocation of available supplies the industrial lands (above all Europe and Japan) are bound to escalate their present national

Last year France advanced the idea of a European-Arab invest-ment and development program tended the community's summit in Copenhagen. But this approach has not proven to be helpful. Anyway France now has a new government. Will this produce a new policy?

competition for Arab goodwill,

And that can only drive prices

Clever Diplomacy

German Chancellor Schmidt is trying to mediate differences between France and the United States and between France and its community partners. His clever diplomacy seems to have inspired certain results and Giscard d'Extaing knows that in some respects he represents a concerted "Europosition to Ford, as a result of the recent Paris summit,

So the prospect of this Giscard-Ford get-together should be propitious. Secretary Kissinger has elaborated a plan for a consumer-producer meeting that is not profoundly in contradiction to Otscard d'Estaing's preference for including underdeveloped na- :: tions. Neither idea automatically excludes the other—as Kissinger

Since this is so—and since both the Americans and French acknowledge the need for solution to avoid world economic disaster-there is every hope for an agreed course of action. France and the United States are old allies but they have often quarreled. On absolutely primordial things, however, like the importance of orderly access to oll and a means of paying for both nations are impelled

U.S. Jobless Rate at Crossroads

By William F. Buckley Jr.

EW YORK—The attention being given to the U.S. unemployment figure is the most concentrated since the approach, by Henry Aaron, to a new world record as a home-run hitter. Every day, the figure inches up. And we are training ourselves to say that when it hits 7 per cent, a drastic change will occur in economic policy. At that point, the pundits are saying, we will reflate-giving to this operation precedence over curbing infla-

Milton Friedman, the wise and learned economist, made recently. a throw-away observation, to which I think insufficient attention has been paid. It is that for perhaps the first time, the number of people in America who stand to be hurt by inflation greatly exceeds the number who stand to be hurt by anti-inflationary measures. That being so, it would appear that the majority would work their way on the minority. And that antiinflationary measures would contime to prevail, over and against inflationary measures. That is the political logic of the observation, but it is unsafe to predict that their integrity as individuals were at the disposition of the state . . . that which is politically logical is that which will happen.

For one thing, there is a lack of common understanding. If -let us use some raw figuresit damages strategically 80 per cent of the American people to do something which will bring tactical relief to 20 per cent of the American people then one needs to inquire exactly into the nature, on the one hand, of the relief for the minority, and the sacrifice of the majority. Using such Benthamite specifications, the pleasure-pain principle would suggest that it obviously hurts the middle class less to suffer a 10-per-cent erosion in their savings by more inflation than it hurts the lower class to suffer unemployment,

The Easy Way

But that is the easy formulation, most popularly resorted to demagogic politicians and socialist doctrinaires. The toughminded contemporary analyst will insist on a closer specification of the pains and the pleasures involved.

For instance: Unemployment today is not by any means the same thing as unemployment in the 1920s, or even in the 1930s. Unemployment once upon a time meant a close brush with extreme physical hardship. It could mean

hunger, even starvation; the total neglect of the family; life without necessary medical aid; without shelter. As a practical matter, the un-

employment we have today means less than that. There is a variety of relief, coming in from federal, state and local organizations, covering food, shelter medicine; even clothing. Granted, the longer one is unemployed, the more attenuated

the relief, depending on the state one lives in. On the other hand. it is also true that one can find without looking very hard, hardy specimens of Americans who have been unemployed for years, and look not that much worse for the experience. It is also true that every issue of every newspaper offers employment of various kinds, day after day, to those willing to do the less attractive work of the society: the menial work. At the other end of the picture.

the erosion of 10 per cent, say.

The International Herald Tribune welcomes letters from readers. Short letters have a better chance of being pub-lished. All letters are subject to condensation for space read sons. Anonymous letters will not be considered for publication. Writers may request that their letters be signed only with initials but preference will be given to those fully signed and bearing the writer's complete address

in the buying power of the middle class is not merely a one-time erosion of its savings. It must be viewed as the refranchising of a long-lived mechanism which cannot be aborted merely by switching gears. It is a process that does more than deduct 10 per cent from the purchasing power of a dollar. It influences myrlad decisions of huge strategic consequence. Alan Greenspan chairman of the Council of Economic Advisers to the President, has said that if we reflate within the next year, it may require 20 years before economic equilibrium is reestablished,

Raring to Go The new Congress is raring to

go, and when that figure of 7 per cent unemployed is reached. we are likely to see or, better, to be overrun by-a huge splurge in Washington, aimed at reducing that figure All the resources of national sobriety are greatly needed now to devise practical means of helping the 7 per cent, without institutionalizing that inflation that cost them their jobs in the first place. The wonder of it is that we have at this odd and crucial moment in American history probably the best orient-ed tight/circle of men who ever held influence and power around the White House. A conservative President is surrounded by tough economic conservative advisers, Greenspan, Simon and Burns, If they cannot publicize the case for sobriety, it is unlikely anyone else ever can; and possible that no one will ever again have the opportunity.

Pilot, 6 Children Survive Peru Jungle Crash

LIMA, Dec. 15 (AF) -A bush flot and six chidren survived a plane crash and walked for almost a week in a Peruvian jungle before they reached civilization early yesterday. Three others died as a result of the accident.

Reports from the edge of the jungle said the pilot and the survivors, 8 years to 14 years of age, are now in a hospital and

The one engine Cessus, plane they were riding on a brief excursion crashed in the jungle on Dec. 7. There was no sign of the survivors until they appeared in the small town of Iscosasin.

Iscosasin, a community of about 6,000 persons, borders the jungle about 400 kilometera east of Lime, but is so remote it is not on the man.

The survivors were taken by helicopter to the town of San Ramon, a larger community on that divide coastal Peru from the

According to the pilot, the seven walked most of the time and lived on roots until they were picked up on Friday by a

Battles Rage in S. Vietnam; 3 District Towns Attacked

SAIGON, Den. 15 (AP) -- Fighting was reported to be continuing today in two provinces bordering had been overrun by North put at more than 3,200.
Victoamese and Vict Cong forces.

town of Duc Phong, 85 miles northeast of Saigon along Highway 14 fell after repeated attacks during the last two days. Spokesmen said radio contact had been lost with the Garrison and there were no immediate reports of casualties or other de-

Two other district capitals and a military base camp in Phuoc Long Province have also been under heavy attack for the last two days, the military command

The only strategic value evident in Duc Phong is that it is astride Highway 14 which leads to the Central Highlands. The attacks in the province appear to have the objective of consolidating and extending North Vietnamese and Viet Cong road systems.

The Saigon command said government forces have suffered more than 3,500 casualties in increased fighting during the last 10 days. Official figures

troops killed, 2,469 wounded and 608 missing, not counting yester-day's action. North Vietnamese mand said that a district town and Viet Cong casualties were

Fighting also was reported to be continuing in Tay Ninh Province, which borders Cambodia to the northwest of Salgon. Two rockets landed in Tay Ninh city yesterday, missing the 25th In-fantry Division headquarters and landing in a populated area. Three civilians were reported to have been killed.

Brig. Gen. Ly Tong Ba, commander of the division, said that North Vietnamese and Viet Cong force of 3,000 to 5,000 men launched a drive on Dec. 6 to take Tay Ninh.

Officers said government forces suffered heavy losses in fighting around the city, 60 miles from Saigen. A platoon of 30 men was said to have been wiped out at the outpost of Phuco Hol. Government forces later secured the outpost and a nearby village.

Cambadia Attack

PHNOM PENH, Dec. 15 (AP). -Government forces, moving behind air strikes and artillery barrages, attacked insurgent bunker lines and killed more than 100 rebels in their drive to recapture an outpost on the Bassac River, field reports said today.

The government attack was aimed at retaking Russey Srok, 11 miles southeast of Phinan Penh, a position overrum by innts more than two weeks

Leningrad Illness Cited by Finns

NEW YORK, Dec. 15 (NYT)

-Two Finnish doctors have made a study that supports a U.S. Public Health Service warning that tourists to Leningrad risk picking up a stubborn parasitic infection that can cause chronic intestinal symptoms.

The Finnish doctors said after

examining stools from a group of Finnish students before and after they had gone to Leningrad that one in four travelers acquir-ed the infection which is called giardiasis

"Every physician should become aware of Leningrad as a source of giardiasis, because the illness can be effectively treated." Dr. Liisa Jokipli and Dr. Anssi Jordpii said in a letter published in the New England Journal of

A giardiasis sufferer can have prolonged diarrhea, abdominal cramps, severe weight loss, fa-tigue, nausea and gas. Symptoms treatment with one of two drugs -Atabrine or FlagyL

Russian health officials had denied that Leningrad was the source for cases of giardiasis reported by the Public Health Service's Center for Disease Control in Atlanta. The center's epidemiologists had estimated that several hundred Americans who visited Leningrad had contracted giardiasis thererafts that navigate the inland waterways in the jungle.

Two children died when the plane crashed. A third died on the trek from infected wounds and other injuries sustained during the crash.

All including the pilot, are members of a large Swiss-German family that settled in the jungle area at the beginning of the century. The family lives in Oxanampa, at the edge of the jungle, about 350 kilometers east of Lime.

nationality, relatives in Lima

The plane, belonging to the Agriculture Service Co., a firm that services jungle plantations, was on a one-hour trip from San Ramon to a plantation near

Press reports quoted the pilot as saying the plane's engine went dead 10 minutes out of San Ramon and it glided much of the way, crashing in a swampy

HOLIDAY TRADITION—A Swiss youth in Basel takes part in a pre-Christmas tradition by dipping a holiday candle in a tent set up in a central square. Proceeds go to a charity to help young dropouts.

In Melancholy Contrast

Jews in Germany Renewing Lives

By John M. Goshko

proximately 27,000 Jews live in West Germany and West Berlin. Contemporary Germany is a far different place from the "Thousand Year Reich" dreamed of by Hitler. It is a dynamic, open, genuinely democratic land. Yet the legacy of "the final solution" endures. The Jewish community of today is so small—less than one twentieth of one per cent twentieth of one per cent less of the population—that it has hardly touched the main stream of German events in the

years since World War II. This is in melancholy contrast to the story of Germany's Jews during the 1,000 years before Hitler. Then, they were the acknowledged aristocrats of world Jewry. Although only 1 per cent of the population, they exerted enormous influence on German life from the Middle Ages to the 20th century. No discussion of German culture, science or political thought can go far without encountering the imprint of such figures as Marx, Liebknecht, Heine, Einstein and Freud.

But this proud history vanished into the holocaust. As an Israeli amhassador to Bonn noted a few years ago, the ranks of Jewish thinkers, writers and scientists will never again he led hy men steeped in the traditions of the

Katherina Focke

German-speaking world, Instead, their successors in the generations to come will be working in other lands and other languages.

Key Roles

Here and there, individuals with Jewish roots to their family tree bave appeared to play key roles in contemporary Germany. Two cabinet ministers in the present West German government are partly Jewish. Katherina Focke is the minister for health and family affairs, and Egon Bahr, currently minister for economic cooperation, was, under former Chancellor Willy Brandt, the most influential architect of Bonn's foreign policy.

Ironically, such stories are even

more commonplace across the horder in East Germany, where there are at most 5,000 Jews and where the government maintains a militantly hostile attitude toward Israel. Still, Jews have been prominent in East German affairs since the late Hans Eisler saluted the state's founding by writing its national anthem. At present, two Jews, Albert Norden and Hermann Axen, are members of the Communist party Polltburo and the mysterions Gen. Markus Wolf is the guiding genius

PERLIN (WP).—Today, ap- behind East Germany's espionage apparatus.

> All these individuals bear the mark of their Jewish background. some quite literally in the form of concentration camp tattoos. Those who were luckier can usually look back on long years spent in exile. They make no secret of their blood. But, while their eminence invariably makes them the object of special in-terest, they are not really part of the story of the Jews in Garmany

Rather, these eminent ones are persons who have chosen to mut aside the persecution of the Nazi era and pick up anew the lives that they led as assimilated Jews in pre-Hitler Germany. Some have heen led to this by intermarriage, some by conditioning in families that had been assimilated for generations and some by simple personal preference.

Lost Desire

Whatever the reason, they have lost the desire to preserve their Jewishness in either a religious or a communal sense. Many have abandoned Judaism for Christianity or the secular religion of Marxism, And, in both West and East, they regard themselvesand are generally regarded by others-not as Jews but as Germans who happen to have some

The real story of Germany's Jews is to be found among those who cling to a way of life that is consciously Jewish. They are the ones who faithfully attend religious services in an effort to maintain Judaism as a living religion on alien soil, who insist on a Jewish education for their children and who have formally enrolled in one of the 69 regional communities that jointly form the Central Council of Jews in

Even the council's name underscores the difference hetween them and those who have chosen assimilation. There is nothing accidental about the way in which the title is phrased to read "Jews in Germany." Many members are still reluctant to refer to themselves as "German Jews." There are some-a show-husi-

ness personality such as television star Hans Rosenthal or a politician such as former Hamburg Mayor Herbert Weichmann-who have achieved considerable celebrity in the gentile world. Most, however, exist in what Inge Deutschkron, a German-born Jew who is now an Israeli citizen and journalist, calls "a voluntary, self-imposed gbetto which shuts its doors to non-Jews after business hours." Or, as a Jewish businessman in Berlin puts it, "We are German-speaking outsiders who live in a world of our own."

Steady Growth

This, Miss Deutschkron says, "is the fault of both sides. The Jews, especially the older ones, are very inhibited. When they meet a German, their instinctive first thought is, 'What was he doing during those years?' Also, someone who lost his family in a death camp has little patience with long, compulsive explana-tions about how most Germans

didn't know what was happening." "And the Jews make the Germans equally uncomfortable," she adds. "The presence of Jews still arouses too many complexes and guilt feelings. Even those Germans who genuinely regret the past—and in all fairness ft must he said that they are the majority -show much more interest in Israel than in their Jewish neighbors here. They find it more com-

fortable to view the matter from a distance.

Given this ambivalence, most outsiders, particularly the Jews of Israel and other Western European countries, cannot understand why other Jews would want to continue living in Germany. Yet, despite all the burdens-

painful memories, the sense of alienation from one's neighbors, the undisguised frowns from Jews elsewhere—there were those who chose to ignore this at-titude. Out of the scattered seeds of European Jewry, a new Jewish community somehow managed to put down roots and grow in the formerly hostile German soil.

It is not a young community. Its members currently have a median age of slightly over 50. Only about 16 per cent of the Jews in Germany are children. As a result, the death rate within the community is six to seven times greater than the birthrate.

Yet, in seeming defiance of the laws of nature, the community has maintained a small but steady growth. That is because immigration has consistently run twice as high as emigration. For one reason or another, the postwar years have turned up successive groups of Jews willing to settle in the country that once sought their systematic extermi-

Some were German Jews who in spite of everything, were simply unable to break the tie with s way of life in which they had been reared. Although no two cases are

exactly alike, almost all the Jews who have returned came back because they could not adjust to life in other countries. Some were professionals—lawyers, journalists, academicians - unable to adapt their training to foreign languages and systems. Even more of the Jews found themselves alone and facing old age in strange lands. They were lured back by the pensions due them from the German government and by the desire to pass their remaining years in a familiar lan-

Another element of the community—the biggest in fact—was formed by Polish and other East European Jews who survived the concentration camps. Unwilling to return after the war to countries over which the Iron Curtain was descending and finding the road to Palestine temporarily blocked, they stayed on in Alliedoccupied Germany.

Originally, most of the East European Jews planned to remain only briefly before moving on to the new state of Israel. To this day, many have remained stateiess persons rather than accept German citizenship; there is a saying among them that they "live in Germany with their hags packed."

But, as they prospered in the

"economic miracle" of postwar Germany, the length of their stays increased. Starting with modest businesses, such as small stores or bars, they gradually branched out into such fields as manufacturing, construction and real estate. By now, almost all bave climbed securely into the financial upper-middle class and some have become very wealthy. Increasingly, the new generation has moved away from the bu-inesses of their fathers and started to enter the professions. And, as the size of the stake that they

down permanently. There also has been a small but steady infusion from other places. A number of Israelis have come to study in German universities or to pursue business opportunities and many have remained indefinitely. Now, West German officials suddenly are facing the possibility of a new inflow from

Today. West Berlin has only about 5,500 Jews. But they form the biggest, most active and most thriving Jewish community anywhere in Germany. And, although their presence is greatly diminished by the standards of the past. West Berlin's Jews have re-established themselves as some-

thing of a force in their city. Just a few steps off West Berlin's most fashionable thoroughfare, the Kurfuerstendamm, is a modern functional building whose only adornment consist of a pair_ of huge, carved stone reliefs placed above the entrance and one corner. They are all that remains. of the great synagogue that once stood on this site but that was plundered and burned by Nazi mobs on the infamous "Crystal Night" in November, 1938.

Now, they are part of the Jewish Community Center of Berlin. These venerable stones, plus a memorial wall in the inner court inscribed with the names of death camps, are a stark reminder of the past. But the community center i. far more than a shrine to former glory and tragedy. It is the bustling, multifaceted cen-ter of a highly organized community that has determined to give its members a framework in which they can lead Jewish lives from birth to old age,

British Town Planners Pessimistic On Future of Urban Development

By Wolf von Eckard:

provement, called for the coustruction of hundreds of new towns to assure orderly industria: and urtan growth.

This month, the association arnounced that the time for major rebuilding in towns and vast capital expenditures in the country is over.

"Confidence in planning could hardly be at a lower ehb-in government, among the general public, developers, industrialists, social workers and community activists and, perhaps above all among planners themselves," said David Hall, the association's director.

He spoke at the association's 75th anniversary conference held here last week in an atmosphere of pessimism.

Actually, the association has accomplished a great deal since it was founded in 1899 by Fbenezer Howard. His idea, set forth in a widely bought and little read book entitled "Tomor-

these cities itself and, after World War II, was instrumental. in the passage of Britain's New Towns Act. More than 30 towns with a total population of 2 million have since been built. Most. of the conference speakers here consider them a success.

The association has also had considerable influence on planning theory and policy in many other countries, including the United States. The "new communities" provisions of the 1970 Pederal Housing Act are remarkably similar to the British legislation. But virtually all of the 15 U.S. new towns which have received some measure of government assistance are now in financial trouble.

Roger Starr, the head of the New York City Housing and Development Administration, did not once mention U.S. new towns in a lengthy speech here. although the most promising of the government-assisted new towns is under construction on Roosevelt Island in New York City's East River.

of their new towns, however, and if they are retreating from their ambitious pians, it is not, they say, because the new town idea has failed, but because government planners have fsi'ed the

The sense of experiment and pioneering was drained out of the early towns, they said, by the delays and frustrations of the unsettled economy of the 1950s. Worse, rather than keep the towns small and manageable, ss Howard had ordained, the government expanded tham, committing the very sin of urban sprawl that the new towns were supposed to prevent.

The worst planning sins, however, were committed in the city, said Colin Ward, the association's environmental education officer. One of the reasons why people fear and mistrust the planning process is that the plenners keep trying to make the crooked places straight, to iron out the kinks, to eliminate nonconforming users and, in short, to impose geometry

ever accepted. Mr. Ward said. was the injunction to "make no little plans."

row, a Peaceful Path to Real in Howard's movement, Sir Pat-Reform," was to relieve the over- rick Geddes, said 60 years ago ONDON, (WP) .- Thirty years crowding of London's slums by that planning, to be successful, Planning Association, a British pressure group for urban improvement, called for the conwe give when transplanting flowers, instead of harsh evictions and arbitrary instructions to move on."

He also advocated citizen participation 70 years before city planners here and in America discovered it. "The ordinary citizen." he said, "should have a vision and a comprehension of the possibilities of his own city." The association points with

greatest pride, however, to the fact that another of its most prominent leaders, Sir Frederick Osborn, in 1945, predicted the downfall of the high-rise apartment building. Here in London this downfall

seems practically assured. Op-position to high-rise living, particularly for low-income families, seems even stronger than in the United States, Nearly everyone has seen and is eager to discuss a recent BBC television program on crime and vandalism in highrise projects that features the destruction of high-rise housing blocks in St. Louis. It is unlikely that public opin-

ion here would permit the construction of any more publicly subsidized high-rise blocks, at least for families with children. Reminded that he was shouted down and jeared by architects and planners only eight years ago for criticizing apartment towers, Sir Frederick said: "Naturally, I pur a hit, but the fact is that I merely said what everyone with experience of housing veys of the time and since then have confirmed: that 80 to 90 per cent of people prefer the hours and garden to the flat."

The Town and Country Planning Association celebrated its 75th anniversary by pointing out that it has always stood for "a quieter, gentier, a more humans tradition than the one which has made the word 'planner' a term of abuse and mockery mmong the general public," es a speaker out 16.

"We used to think we were rich and could do anything," Mr. Ward said. "Now-praise be the bottom is said to have fallen out of the property market and the energy crisis is adding a new dimension of 'energy budgeting' to our assessment of urban futures: "Riches may be learning end

U.S. Town Uses Payoff' to Police public 1 To Reduce Crime

ORANGE, Calif. (AP).—Crime bounty hunting because they do not get pay increases for arrests but in this suburh of Los Angeles it is down by 16.28 per cent this year. The police force's secret veapon is money.

Since January, the city has been rewarding its policemen with a pay raise for each 3-percent drop in the crime rate. The increases have boosted base pay by as much as \$80 a month.

Police Chief Merrill Duncan

says he has received hundreds of letters from police departments across the country and abroad, inquiring about the innovative program. The program's success is under-

scored by comparing the crime rate here with the rates in two neighboring cities. Santa Ana's crime rate has jumped 17.1 per cent in the last year and Anaheim has had a 17.6-per-cent

Interest in Shift

Neither city has plans to adopt Orange's incentive program, unique in the United States. Chief Duncan says that because of the program, officers from other departments are showing interest in transferring

to Orange.
"We are attracting experienced men," the chief said. "There is a waiting list of people wanting to come on the force."

But Chief Duncan said that

with the decrease in the crime rate, there is little need to add to the force of 116 men, which is about average for a U.S. city of Orange's size and population -19.6 square miles and 85,000 persons. So far, the city has paid \$80,000 in bonus increases to policemen-far less, Chief Duncan says, than it would have cost to hire more personnel. The salary increases will remain even if crime in Orange starts to rise again.

Integrity Cited

The senior officers in Orange's Police Department - lieutenant, capitain and chief—do, not par-ticoste in the wage-incentive program. They are classified as managerial personnel.

"In a dishonest department there would be cheating," Chief Duncan says. "This is not a dis-benest department, I depend on the integrity of our system."

The wage-incentive program

was created during bargaining with the city over police salaries last year. "They kept telling us how they

were the best police force Miller said. "We wanted them to prove it."

The city decided to add 1 per cent to the policemen's salaries for every 3 per cent reduction in rape, robbery, burglary and auto theft—the most prevalent crimes in this middle-class community. .The program does not encourage

not get pay increases for arrests What does pay off is stopping crime before it happens.

Policemen have devised many preventive measures. Officer Milt Galbraith, a training officer in the Community-Services Division. outlined some of the new tactics: • A program called "The Watchful I" teaches crime pre-

vention to housing-development and apartment dwellers, using films and lectures by policeme The officers demonstrate security devices and urge residents to call police whenever they think a crime might occur.

 The neighborhood officer concept has been reinstated, allowing an officer to stay assigned to the same neighborhood indefmitely. He learns the problems of a specific area and is able to take precautions.

· To stop auto thefts, police prowi parking lots looking for unlocked car doors and open windows. In such cars, they drop a leastlet reading, "If I were a thief, would have stolen your unlocked car." A similar practice is employed at unlocked garages. Owners find a leaflet: "If I were a thief, I would have carted away half your garage."

· The Police Department has proposed a bill to the city council which would require builders to install better locks on homes and apartments.

· Officers are taking the time to talk to apartment managers about installing brighter lights and informing tenants about the crime-prevention program,

Extra Loaf

There are so many things being done," Officer Galbraith said. The officers themselves see the need. And they also think, Tr I'm going to put an extra loaf of bread on the table, this is what has to be done.' The everall result is a lot of

self-pride among the officers," he

The 16.28-per-cent drop in the four major crimes bere contrasts with a 7-per-cent rise in all major crime in California during the first six months of this year, the latest figures available. Only one other California city, San Francisco, has reported a crime reduction this year, a 6-per-cent de-cline. Nationwide, the FBI reports that major crime has increased by more than 15 per cent Officer Galbraith said there

were 2.499 rapes, robberies, burglaries and auto thefts in Orange last year, and nearly 2,100 this types of crime were negligible both years, the police reported.

"And the word is spreading." he said, "that most burglars who come into Orange get caught. We haven't added any new punishment but we tell the ones we catch, "Tell your friends not to come to Orange."

PATROL DUTY-Patrolman Robert Reifeiss, left, and master patrolman Bill Yackle prepare for a patrol.

The Success of Japanese Immigration to Brazil

By Leonard Greenwood SAO PAULO, Brazil—The 66year-old story of Japanese im-migration to Brazil is one of success that has aroused the awe. envy and some currents of resentment among Brazilians.

The 250,000 immigrants have grown to 730,000, less than 1 per cent of Brazil's population, yet they have had a profound impact on its economy and eating habits. The Japanese have dominated sectors of agriculture, developed mechanization and the use of

fertilizer and modernized transport and marketing. In the great wholesale food market of Sao Paulo, half the deals are in Japanese. Produce is bought and sold by giant cooperatives. The higgest, named Cotia after the town where it is based, handles 10 per cent of all movement and it is 80 per

cent Japanese-operated. Yoshiniko Horino, chief of Cotia's fruits and market garden produce, says Japanese farmers produce roughly half of Brazil'e greens, tomatoes, eggs and pears and more than 90 per cent of its tes, grapes, strawberries, plums and sweet melons. In Sao Paulo State, only one in 10 persons in agriculture is Japanese. but they grow a third of the

Brazilians cat grapes year

in Parana can grow two crops. Housewives in the far south buy sweet meions in winter, grown by Japanese farmers 4,000 miles north in the Amazon. On the remote northwest frontier, where dried black beans were the only vegetables five years ago, shops now sell lettuce, tomatoes and

at a village in the jungle called 13th of September. Nearly all early Japanese settlers came to Brazil as agricultural laborers. Growing and mar-keting food is still their economic base, but for years now the Japanese have been moving into

vegetables grown by 26 families

the cities. Today, only half of Brazil's Japanese are still in agriculture. Nearly 40 per cent are in commerce and the remainder in industry.

In Sao Paulo, the districts of Liberdade, where the first Japanese shops and boarding houses in the city opened along Rua Conde de Sarzedas in 1930, and Saude are completely Japanese. Saude has 50,000 Japanese and Liberdade 30,000. The Japanese immigrants came

to Brazil to escape poverty.

Japan was still suffering from

the disruptions caused by the

end of feudalism in 1868. Msny

had gone to Hawaii and the

opposition from the white labor At that time, Brazil desperately

needed labor for its great coffee plantations. When slavery ended in 1888, Brazil brought in thousands of Italians. But after the coffee market collapse of 1902 the Italians suffered so much their government stopped them from coming.

In 1908

The first 781 Japanese sailed into Santos Harbor—gateway to the "promised land"—in 1908. They toiled on the plantations only for food and miserable

During World War I, developers opened new lands in the south and west of Sao Paulo State and Parana. They were not so fertile as the red soil of the old plantations .nd prices were low. Japanese immigrants ent down their savings as deposits and bought 60-acre lots on

By the late 1960s, the third and fourth generations of Brazilian-born Japanese were growing up. The tight bonds that are vestly different from those had held the community togetber were crumbling and the young were integrating into Brazilian society.

A buge chasm has opened up United States, but they ran into between the generations. Older

For them, the tea-drinking ceremony is a part of life. They have learned little Portuguese, and outside the colonies they are

Shock Parents

strangers in the land.

Tolay, Japanese - Brazilian teen-agers wear jeans and the girls shock their parents with their hikinis. Their friends are Brazilian, their language is Portuguese and their allegiances are strongly Brazilian.

"You might annoy a young Japanese hy calling him Japanese," an American businessman said, "but you will never insult him by calling him a Brazilian."
A European banker, who is fluent in Japanese, says that in some families there is almost no communication between the gengrations. 'Twe often had to interpret between parents and child;en in Japanese homes," ha

Today, a new wave of Japanese is sweeping into Brazil-the dark-suited financiers, industrialists and businessmen. They who came before, for with their millions and their technology. they're laying plans to make Brazil a showpiece of overseas Japanese investment.

Considered Success

Doubts About Future of Dollar Dominate Investor Psychology

By William Ellington

LONDON, Dec. 15 (AP-DJ) .- creased its reserves by about \$900 rrency considerations are the minant factor in Eurobond insting psychology these days, iderwriters and dealers report. The dollar has been taking a sting on the foreign exchange arket, recently dropping to new ws for the year against the enclux currencies and French and while approaching the yearlows for the deutsche mark nd Swiss franc.

Dealers say European investors Dealers say European investors re reluctant to take advantage f the appreciation of their own urrencies to buy Eurodollar onds cheaply. The explanation ppears to be that there is still ensiderable uncertainty about se outlook for the dollar. Will so 2 lot lower? What will take it rise?

These questions are hard to newer because much depends on that the oil-producing states do rith their dollar receipts as far s diversifying them into other

urrencies is concerned. Fairly Good Picture

Nevertheless, a fairly good picture of what has been hapsening to the dollar is emerging. When nil prices were quadrupled about a year ago, many analysts predicted that the demand for iollars to pay for oil would be

It was argued that as a result European central banks would nave to sell off their dollar eserves to prevent the European currencies from declining too

much against the dollar. Instead, the opposite actually happened. Most countries borrowed dollars to pay for oil and temporarily, at least, their reserves have been going up.

By Thomas E. Mullaney NEW YORK, Dec. 15 (NYT) .-In recent statements, many leading businessmen, economists, labor leaders and other critics of the nation's economic policies have concentrated on one central theme: The lack of forceful leadership by the Ford adminis-tration in addressing itself to the gravity of current problems.

More than a few of these critics cite as Exhibit A the fact that a full year has elapsed since the Arab oil embargo underscored the seriousness of the Western world's energy shortfall but the United States has still failed to come up with a program for coping with it and to diminish dependence

on foreign oil.
Other opponents of the administration's stance have pointed to the drift plainly evident in its response to two other economic problems. High inflation lingers and a widening recession is devel-

oping while Washington vacillates. Meanwhile, each day brings further confirmation of a deteriorating economy. Unemployment is at 6.5 per cent and rising, announcements of plant shutdowns are increasing steadily, retail sales across the country are disappointing for this normally robust season, the auto and housing industries are virtual disaster areas, corporate profits are declining rapidly, the financial markets are seriously depressed and business capital-spending programs are being trimmed as sales and new orders lag.

No-Growth Year

The picture is not likely to brighten soon. The tone of economic forecasts is pessimistic. Even the most optimistic of the prognosticators do not see any npturn in the American economy before mid-1975, while most expect the ing to a peak of 8 per cent or more and a stubbornly high rate of inflation that may recede only grudgingly from its recent 12-per-cent level to the zone of 6 per cent to 9 per cent by the end of 1975.

There are a few bright spots. The wholesale price index last month, for instance, showed B rise of 1.2 per cent, only half as much as in October, as the upward push in industrial com-modities slowed. And interest rates are continuing to recede from their lofty heights of recent months. And the oil-producing nations last week decided against any significant price increase for

enthusiasm for a broad advance.

the general economic autlook remains gloomy.

first-quarter U.S car production in 14 years.

Admittedly, the troubles of the American economy are multi-faceted and not comparable to

the mammoth problems besetting other leading nations, but a donothing stance in facing up to them is dangerous. And that, unfortunately, has been the record of the Nixon and Ford administrations so far, many observers If some of the energies ex-

pended by the administration on international political problems were applied to the economic area with equal imagination and determination, it is felt, the threat of a global depression might now

the first nine months of next year

-a small consolation.

be much less severe. Some critics of the administration's economic performance attribute it to inept analysis of the problems; others say it reflects a misreading of the attitude of the American public.

Page 7

Oil Imports What is necessary above all -and quickly-is a compulsory plan to cut down the use of imported oil and to increase do-

mestic supplies of energy.

The adamant stand by President Ford against a sharp in-crease in the federal gasoline tax is baffling when so many see conservation and revenue-raising ad-vantages. Its effects on lowincome groups could be minimized through tax rebates or lowered income taxes and it would help pay the cost of the programs voted by Congress last week to fight unemployment. Some tax incentives to develop new energy supplies also seem warranted, as do suggestions for bolstering capital formation, Business and labor could help with greater produc-

Some observers believe that the expected confirmation of Nelson Rockefeller—a man of strong ideas and executive experience as vice-president may imbue the administration with a new sense of determination and leadership on domestic problems, especially economic issues.

If it happens, it would be a giant step in the right direction in these perilous times.

U.S.-Japan Fishing Pact

TOKYO, Dec. 15 (AP).-A United States and Japan have initiated their 1975-76 fishery agreement calling for Japan to reduce its total annual fishing catches in the East Bering Sea and the Northeast Pacific by 25 per cent to 1.5 million tons.

Foreign Bonds

Monex International, Ltd. now offers four of the world's most popular gold coins—U.S. Gold Double Eagles, British Gold Sovereigns, Mexican Gold 50 Pesos and Austrian Gold Coronas.

U.S. Gold Double Eagles contain .9676 Troy ounces of pure gold and are .900 fine (21.6 karats). The unit of purchase is called a "Lot" and contains 20 Double Eagles.

British Gold Sovereigns contain 2354 Troy ounces of pure gold and are 916?; fine (22 karats). One Lot of Gold Sovereigns contains 100 coins. Mexican Gold 50 Pesos contain 1.20 Troy ounces

of pure gold and are :900 fine (21.6 karats). One Lot of Gold 50 Pesos contains 20 coins. Austrian Gold Coronas contain .9802 ounces of pure gold and are .900 fine (21.6 karats). One Lot of

Austrian Gold Coronas contains 20 coins. All coins are guaranteed genuine and are in at least extra fine condition. You may purchase outright or, except in certain states, with financing.

"Hnw to Purchase Gold Coins," a new informational booklet, explains the terms of purchase: pickup and delivery procedures: sales: calculations for two typical purchases; and answers to five common

questions about buying gold. For your FREE copy of "How to Purchase Gold Coins," send the coupon below.

Gold Bullinn: As soon as it's legally possible. Monex will begin to buy and sell gold bullion. If

you'd like to receive information on how to buy gold bullion through Monex, check the appropriate box in the coupon below.

Monex International, Ltd.

Holzhausenstrasse 14 6 Frankfurt am Main, West Germany

One of the world's largest suppliers of sitver and gold coins. Serving you with silver coins, silver bul-lion, platinum. Swiss francs, Deutschemarks and numismatic gold.

"I Please send me a free copy of "How to Purchase Gold Coins." I understand there is no charge or

obligation. Please send me information about how I'll be able to purchase gold bullion through Monex, when it's legal.

Walter Lippmann, U.S. Journalist, Is Dead at 85

(Continued Iron Page 1)

Cr. Weingast continued. He wears no bettle scars because he is an observer rather than a parlicipant in the struggle. He has elected a position that is detached and somewhat remote." D'strusting passion and emo-

tion as components of thoughtful nalysis Mr Lippmann himself agreed that he tended to deal generally rather than specifically with politics. "Look here," he ence told a colleague, "I can't always be raising a flag and rushing off to oattle."

Mr. Lippmann's growth to eminence over the inst quarter of a century was a triumph of persistent application of reason to world and domestic problems. In his columns ar other writings. he disdained the personal and shied from the scoop and the oracular. What gave him readability and immense authority was his ability to take a tangled bondline issue, analyze it coolly and relate it convincingly to the underlying problems of which it was a part. He always wrote frem a background of solid in furniction and m this sense he vies also a public schoolmaster who oblige his readers to think of the transient in terms of the everlasting.

He wrote next to nothing about himself and his methods, but he did take the occasion once to deny that he was a critic for critlcism's sake. "It is not enough to criticize the official's policy," he said. "We must put ourselves inside his skin, for unless we have tried to face up to the facts before him, what we produce is nothing but holier-than-thou morelizing."

Historical Heritage

From Mr. Lippmann's columns, especially those since 1938, and from his books, there emerged an insistence that Americans
"isce up to the facts" of their historical heritage, their perience in government, their responsibilities in the world. In a typical expression of this concept of American freedom, he wrote:

"To perpetuate the Republic in this epoch of war and revolution it is now more than ever neces sary that we maintain the marriage of Jeffersonian liberty and Hamiltonian authority. We can do ourselves no greater injury than to become unconscious either principle; so enamored of freedom that we do not construct strong lawful authority to contain it and sustain it, or so apprehensive of freedom that we seek to deny it and suppress it. "The conflict of the two prin-

ciples can be resolved only by uniting them. Neither can live alone. Alone, that is, without the other, each is excessive and Intolerable. Freedom, the faith in man's perfectability, has al-ways and will always in itself lead through anarchy to despotism. Authority, the conviction that men have to be governed and not merely let loose, will in itself- always lead throug... arbitrariness and corruption to rebellion and chaos. Only in their union are they fruitful Only freedom which is under strong law, only strong law to which men consent because it preserves freedom can endure."

As a public political thinker who exposed his views to millions, Mr Lippmann was subject more than most to faultfinders and critics, especially those who professed active liberalism in the New Deal years. Among the most acid of his critics was Heywood Broun. Mr. Lippmann, his friend and colleague said, was "quite apt to score a field goal for Harvard and a touchdown for Yale in one and the same play. But, of course, he specializes in safeties."

Seeming Indifference Mr. Broun, who in 1933 organized the American Newspaper Guild, became annoyed with Mr. Linomann's seeming indifference to trade union matters. "I think I would die bappy on the opening day of the general strike." he wrote at the time, "If I had the privilege of watching Walter Lippmann heave half a brick through a Tribune window at a nonunion operative who had been called in to write the current Today and Tomorrow' column on the gold standard."

Not all criticism was as flip as Mr. Broun's. Prof. Fred Rodell of the Yale Law School took the commentator to task in The American Mercury is 1945 as a columnist who wrapped in portentousness not to say solemnity, of language, ideas of small import. The elaborateness of the package, Professor Rodell argued, hid the meagerness of the gift inside

Much of the controvers, over Mr. Lippmann concerned alism." It was also inspired by his compulsion to see many sides of a question, by his tendency to associate with wealthy compan-ions, the great and the powerful to the exclusion of the rank and file. Mr. Lippmann's friends countered, however, that he applauded the policies of Roosevelt Wilson and Alfred E. Smith: that he opposed the Ku Klux Klan and peonage in Florida; that he advocated humanizing industry, Social Security, public works, and coexistence and trade with the Scriet Union. On the other hand, his columns opposed the Wagner Labor Relations Act and much Deal legislation, and voted for the minuscule Alf M. Landon in 1936, for Thomas E. Dewey in 1944 and 1948 and for Dwight D. Elsenhower in 1952. Summing Up

Summing up the contentions of Mr. Lippmann's critics, Dr. Wein-

"Lippmann's record suggests that his enthusiasm for reform

AT DINNER IN PARIS-During his many travels, Mr. Lippmann met in 1962 with Maurice Schumann, a Gaullist leader and longtime foreign minister of France.

they are written into law. For while he has steadily professed liberal principles, he has often recoiled from liberal enactments." The orderliness of M: Lippmann's later life started virtually from his birth into a world of quiet affluence. He was boru Sept. 23, 1889, in a New York brownstone on Lexington Avenue between 61st and 62d Streets. His father, Jecob, was a prosperous clothing manufacturer and real-estate broker who retired from business early in life. His mother, Daisy Baum Lippmann, was gracious and handsome, the able manager of a genteel, uppermiddle-class household. The third adult in the family was Mrs. Lippmann's riother, a wealthy, cultured matriarch who doted on

her grandchild. Walter was an only child, and he was treated as a special kind of pirzon. He was shielded from the rough-and-tumble experienced by most children, and tiresome chores were done for him by servants. He took only a small part in sports. Instead, he read and traveled, going to Europe almost every summer with his parents.

Degree in 3 Years

Young Appmann ente.ed Harvard in 1906 and took his bachclor's degree, cum laude, in three years.

He was not a joiner, and indeed he was excluded from the student clubs because he was a Jew. At Harvard, then a place of ferment, his imagination was captured by Fabian Socialism, and he became president of the Harvard Socialist Club.

In 1910, in what would normally have been his senior year, he took a discussion course with G:aham Wallas, a visiting British lecturer and well-known Fabian Socialist. He made such an impression on Mr. Wallas that he dedicated his book, "The Great Society," to Mr. Lippmann when it was published in 1914. He also met Ralph Albertson, a liberal Socialist with three daughters, one of whom, Faye, a vivacious and comely girl, Mr. Lippmann married in 1917.

The 4th Year

Throughout college, he wrote for the various Ha:vard literary magazines, and one of his articles brought him to the attention of George Santayana, whose "The Life of Reason" (1906) is a classic of philosophy. Mr. Lippmann served his fourth year at college ns that gentle and urbane Spaniard's assistant. In the summer of 1910, Mr.

Lippmann went to work for Mr. Albertson as a writer on the Boston Common, a small left-of-center journal. It was from there that he was plucked to national journalism in unusual circumstances. Lincoln Steffens, the famous muckraker, was the major writer for Everybody's magazine. He proposed finding and training a cub writer and was challenged by doubting editors to do it. As Mr. Steffens retold the incident: "It was late that summer [1910] when I went to Cambridge. The

g:aduated class of Harvard had

scattered. There were a few of

them left around Boston, and some professors. I described the man I was after. I asked for the ablest mind that could express itself in writing. Three names were offered, nnly three, and after a little bit of conversation everybody agreed on one-Walte: Lippmann I found Lippmann, and saw right away what his classmates saw in him. He asked me intelligent, not practical, ques-tions about my profession and when they were answered, gave up the job he had and came to New York to work with me on my Wall Street series of articles. It was reporting. I was writing in my house in Connecticut. He went to Wall Street for the facts, which he reported to me. He 'caught on' right away. Keen, quiet, industrious, he understood the meaning of all that he learned; and he asked the men he met for more than I asked for. He searched them."

Massine Article Mr. Steffens thereupon gave

Mr. Lipumann his first magazine assignment, to do "a subject well within his personal knowledge." The article, "The Open Mind-William James," came up in proof under Mr. Steffens's hyline, which he changed just before publication. The article impressed the measures ends at the point where editors of Everybody's, and within a year Mr. Lippmann was on the editorial board.

From that point on, Mr. Lippmann's life was divided into four distinct phases—the young intellectual who worked with George Croly on the New Republic; the brilliant but sometimes bored editor of the editorial page of the New Yo.k World; crusty years in opposition to the New Deal as writer of the column "Today and Tomorrow" in The New York Herald Tribune and other papers; and, beginning in 1939 with a move from New York to Washington, columns on world affairs and columns, with largeness of spirit, on American politics.

In 1914, the New Republic was started and Mr. Lippmann was with it. Both he and the magazine were soon in the clasp of the drama of World War I, Much of this is reflected in "The Stakes of Diplomacy," which contains a study of the causes of the war and the perils likely to persist after its conclusion,

In the summer of 1917, Mr. Lippmann was in such excellent favor at the White House that he was put on a special (but informal: committee that prepared the territorial sections of President Wilson's Fourteen Points for peace.

Political Propaganda In 1918, Mr. Lippmann served ebroad briefly as an Army captain, churning out political propaganda, a chore that ended with the Armistice and bis attachment to Col. House's staff at the Paris

Peace Conference. Back in New York, Mr. Lipploann worked again briefly on the New Republic, resigning to complete his book "Public Opinlon." Shortly thereafter, he was invited to join the World, where he wrote editorials for two years. In 1923, on the death of Frank Cobb, be was given charge of the editorial page with the title of cditor. To some, like Mr. Croly. this shift to the World was an apostasy of idealism for the fleshpcts of Park Row. The World. lowever, was the nation's most scintillating newspaper and the goal of aspiring writers. Mr. Cobb was legendary as a great editor, and besides there were Rollin Kirby, the cartoonist, and the writers Heywood Broun, Arthur Krock, Allan Nevins, James M. Cain, Franklin P. Adoms and Charles Merz, among others,

World Positions

The World, under Mr. Lippmann's leadership, inveighed against the Harding, Coolidge und Hoover administrations, sup ported the World Court, urged more cooperation with the League of Nations, wanted lower tariffs and more world trade and gave strong backing to Alfred E. Smith for the presidency.

One of the most controver-

sial positions that The World

and Mr. Lippmann took was on the Sacco-Vanzetti case. The paper questioned the justice of the conviction of the two anarchists in a Massachusetts payroll robbery but swung around when a commission headed by A. Lawrence Lowell, president of Harvard and a onetime teacher of Mr. Lippmann, sustained the judgment. Mr. Lippmann wrote a piece praising the commission's good intentions, which outraged Mr. Cain and led to Mr. Broim's leaving the paper when it declined to publish his column attacking the Lippmann editorial.

Soon after The World was taken into the Scripps-Howard chain and its name merged with that of the Telegram, in 1931. Mr. Lippmann entered the third, and most controversial, phase of his career when he was invited to write a signed column, "Today and Tomorrow," for the Herald Tribune. When he accepted, many liberals were aghast, for the newspaper was widely regarded as the organ of Wall Street Republicanism.

Then 41, he was the author of 10 books and already one of the most authoritative voices of liberalism. The Herald Tribune promised him complete freedom of ex-

Like every other commentator, Mr. Lippmann proved fallible. He made some mistakes in judgment, and some of his predictions turned sour

At first he thought, for example, that Franklin D. Roosevelt would never make it. But a month before the 1932 election. he announced he would "cheerfully" vote for Gov. Roosevelt. His columns on the New Deal were favorable at first. But after 1935, he grew steadily more hostile, auspecting that the New Dealers were a bunch of Socialists leading the country toward collectivism. He had long since emerged from his own Socialist phase. Some of his liberal friends were appalled by what they considered a strong shift to the right. They were convinced when he came out for Mr. Landon in

His first marrlage having broken up in divorce, in 1928 he married Helen Byrne Armstrong and moved to Washington. Increasingly, from that time, he turned his attention to world affairs. His cool prescrip-tions of sanity and reason, emanating from what was now a truly world capital, increased his influence and gave his columns a new authority. This maturity showed, too, in his book "U.S. Foreign Policy," which stresses American world responsibilities after World War IL

Mr. Lippmann never thought much of President Harry S Truman, so he came out for Gov. Thomas E. Dewey in 1948.

As postwar relations worsened between the United States and the Soviet Union, he wrote a series of columns, later published as a book, "The Cold War," in which he first set forth his conviction that there would be no peace unless all armies were withdrawn from Germany.

Mr. Lippmann was irritably impatient with the second Eisenhower administration. He bad voted for Mr. Eisenhower in 1952 because I felt he would be able to end the Korean war and because he would be able to liquidate [Sen. Joseph R.] McCarthy." But he thought the President had made a mistake by accepting the nomination in 1956 after having had a heart attack.

To Republicans, Mr. Lippmann seemed hopelessly biased as the 1960 elections approached. They were not surprised when he declared for Sen. John F. Kennedy.

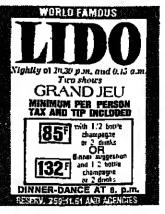

In the election of 1964, Mr. Lippmann was a hiting, often sarcastla, critic of Sen. Barry Goldwater, the Republican nomince, and of the Republican party for having chosen him. Not as a necessary consequence, however, Mr. Lippmann supported President Johnson for election, praising his deliberateness, his appeal to reason and to a national consensus. In foreign affairs, Mr. Lippmann continued to press for a Soviet-American rapprochement and for more realistic dealings with Communist China. He gave up his syndicated column in 1967.

THE TRIUMPH OF ART NOUVEAU: Paris Exhibition 1900

By Philippe Julian. Translated from the French by Stephen Hardman. Larousse. 216 pp. Illustrated. \$19.95 until Dec. 25, 1974; \$25 thereafter.

Reviewed by Anatole Broyard

THOUGH it anticipated the official birth of that more ment by some 30 years, the Paris Exhibition of 1900 was undouble edly the greatest surreslist event. of all time. The world's most powerful nations assembled there to glorify and caricature themselves in the competition for "modernity" that ushered in the 20th century. Electricity was the exhibition's dominant theme. If was "the great signal" of a "dawning apotheosis—the Age of Light." Light was seen as switch. ing on a happiness and prosperity, just as darkness connoted melancholy and poverty. Sixteen thousand incandescent lamps and 300 arc-lamps lit up a glittering future that had already prompted Victor Hugo to apostrophize his mother country in these terms: "You are so great that soon you will no longer be. You will cease to be France, you will be Enmanty; you will cease to be a nation, you will be ubiquity. In plain English, the exhibition had been seized upon by the Third Republic as a cosmetic cover-up tor its many flaws, defeats and

"The Triumph of Art Nouveau: Paris Exhibition 1900" is brillant social history because Philippe Julian is one of those mellow ironists who can still appreciate the absurdity, the sentimentality, the naiveté and the bombast that make the panorama of "progress" such a colorful tragicomedy. Rarely condescending to human frailty, he treats it like a lover whose mistress no longer attracts, but continues to interest

The exhibition occupied 1,500 acres along both banks of the Seine, in the neighborhood of the Eiffel Tower, Most of the recognized nations of the world were invited to participate—even Russia, with whom France was at war. Most countries accepted and proceeded to plan a pavilion that, more often than not, epitomized the best and the worst in their cultures. The result was an architectural potpouri that

Solution to Friday's Puzzle

GARION

runtured the rhetoric of even Prench commentators. "Highly original hideousness . . . Too viotent magnificence... Outdo in incoherence... Luxurious cannone and machine guns"-these phrases give us just a pale hint of their paroxysms.

Curiously enough, it was an American, Loie Fuller, not a Frenchwoman, who became the herotne of the exhibition. "Neither pretty nor young" she was famous for her "butterfly dance." which celebrated the "biological romanticisms that characterized the age. Her influence reached as far as Gallé's jewelry and La-lique's glassware. The swirl of ber shawls can also be seen in the wooden "drapery" of art nouveau furniture.

As Mr. Julian observes, most of the pavilions "suggest the in-ventions of a Piranesi turned mechanical engineer, while others resemble the sets which Cecil B. de Mille was to construct." There were "palaces" for everything. even for thread and fabrics, as well as an entire Swiss village, a North African casbah, an imitation of Venice's St Mark's, a chalet, an Elizabethan manor, a pagoda, a Byzantine call-it-what-you-will. African huts and varjour other unclassifiable struc-tures. The United States was represented by a building which inspired a visitor to write: "One well-equipped post office and you have seen America." There were 76,000 exhibitors. 36,000 of them French. In the seven months of the exhibition, some 50 million tickets were sold, although Marcel Proust, André Gide and Paul Clandel saw fit to snub their country's "wildest dream."

Conveying some idea of the scale of the exhibition, a banquet was given for 20,777 mayors of France. A reconstruction of "Old Paris' presaged our own Disney-land, as well as a plague of pseudo-medieval décor.

When it was all over, only the restaurants, theaters and other places of commercial entertainment showed a loss, probably because of the embarrassment of other riches. The exhibition itself not only made money: it made history too. France, says Mr. Julian, was restored to the rank of a great power. An "inter-national democratic ideal" was sent "slouching toward Bethle-hem," and after 1900, the French electorate moved toward the left. Which only goes to show that bread and circuses' may do as much for "progress" as the less-peaceful expedients that increas-ingly monopolize our attention.

Anatole Broyard is a book critic for The New York Times,

How do you play the pawn-shead middle game? Naturally, it would be an exaggeration to propose neg-lecting altogether the small material advantage; the pawn is there and is very often sufficient to decide the game.

If the extra pawn is weak, it must be either given additional support or exchanged for one of the opponent's healthy pawns. Moreover, all exchanges must be evaluated in terms of the possible end games that might arise. For example, if the pawns will all be on one wing, a knight should be retained, while a bishop would be most useful in a widely scattered pawn

position. But you should not become hut you should not become so preoccupied with themes involving the pawn that other ways of winning are bypassed. Emanuel Lasker, world champion from 1894 to 1921, put it well in advising. "When you have found a good move, look for a bet-ter one."

The Rule Illustrated

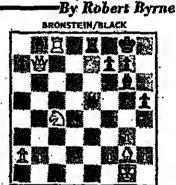

The game between Vasily Smyslov and David Bron-stein from the U.S.S.R. First League championship in Odessa illustrates how Lask-

Odessa illustrates how Lasker's rule can be applied to a
pawn-ahead middle game. Indeed, the sharpest tactics
of Smyslov's play came after
he won his pawn.

Bronstein's London System
works more safely if Black
first plays 3 . . P-B3 (delaying White's P-B4) and only
then 4 . . . B-B4. In this game,
Smyslov was able to open the
QB file by 5 PxP, PxP, virtually forcing the Black
queen into an uncomfortable
position by 6 Q-N3.

Although the theory of this
defense has been known for
more than 50 years (Capablanca first played it in the
London 1922 International
Tournament), Karpov bungled

Tournament), Karpov bungled it in the same way against Korchnoi in their 15th match game. However, whilks Bron-stein. Karpov made amends for his weak opening by play-ing the superior 11 . . B-N3, answering 12 N-K5 by 12 . . .

SMYSLOV/WHITE Position after 24 N-B4

N-Q2, thus limiting Kor-chnoi's advantage to the hishop-pair after 13 NxB, RPxN.

Bronstein's 11 ... Q-02 left Black vulnerable on the QB file after 12 N-K5, NxN; 13 BxN. He could not handle Smyslov's sharp thrust 14 P-K4 by 14 ... PxP because, after 15 PxP, he would have had no decent source for his Bronstein's 11 had no decent square for his queen on the coming 16 KR-

Perhaps Bronstein should Perhaps Bronstein should have thrown himself into the sea of complications resulting from 14...N-N5; 15 B-B4, P-Q5; 16 N-N5, P-QR3; 17 N-B7, QR-B1, although, after 18 B-R3, P-KR4; 19 QxNP, it is not clear how Black can redeem the lock Black can redeem the lost Dawn.

Vain Sacrifice

Instead, he sacrificed the QP, hoping to get some use out of the bishop-pair after 17... B-K4. However, he could not accept Smyslov's counter-offer of the QP by 18... BxQP because of 19 KR-Q1, B-K4; 20 N-B6ch, which get the period in Smyslov then bered in

whiting the queen.
Smyslov then bored in sharply, exchanging his QP at move 22, setting up the pin 23 R-B8 and annihilating the defense 23 . . Q-K4 by 24 N-B4, cutting off the protection of the black king bishop.

When Bronstein's desperate struggles for counterplay were cut short by Smyslov's devastating 28 Q-B3 (threatening 29 QxP mate), Black was forced to give up.

Eagles, Falcons, Redskins Triumph

PHILADELPHIA, Dec. 15 (UPI). -Rookie quarterback Mike Boryla won his third straight game for the Philadelphia Eagles today, turning two first-quarter numbles into touchdowns in a 28-17 vic-tory over Detroit.

Boryla threw a six-yard scoring pass to Harold Carmichael after lineman Mitch Sutton recovered a fumble by Ron Jessie on a-swing pass at the Detroit seven-

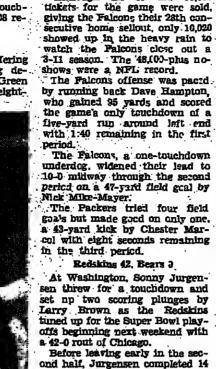

TD pass to Charles Young late in the third quarter. Young caught seven passes for 72 yards to overtake Drew Pearson of Dallas for the pass-receiving leadership in the National Conference with 63 receptions. Pearson has 62.

The touchdown pass to Young sealed the victory after the Lions had pulled to within 14-10 on a one-yard sneak by quarterback Greg Landry. Boryla then drove yard touchdown plunge by Tom Sullivan with 6:46 left in the

of 22 passes for 205 yards. In addition, Charley Taylor caught two touchdown throws and Duane Thomas produced 102 yards on eight carries. The Redskin defense also con-

tributed four interceptions and four sacks of three Chicago quarterbacks.

The Redskins gave quarterback Bill Kilmer the day off and substituted freely throughout the second half against the demoral-ized Bears, who wound up with 4-10 season record.

Delphins 34, Pats 27 At Mimai the Dolphins' eserves, led by aging quarterback Earl Morrall, spotted New En-

gland a 24-point lead, then rolled to a 34-27 victory.

Morrall shrugged off two passinterceptions to hurl touchdown bombs of 37 and 46 yards to third-string receiver Melvin Baker. It was the 40-year-old Morrall's first start of the season as Miami coach Don Shula rested quarterback Bob Griess for the playoff opener against

Don Nottingham, subbing for fullback Larry Csonka, who also rested, scored two touchdowns on one-yard plunges. His second score came after Benny Malone's 73-yard kickoff return and provided the go-ahead points with 9:25 left in the game.

the Oakland Raiders next Satur-,

New England running back Mack Herron set a new NFL season combined yardage record of 2,444 yards rushing, pass re-ceiving and returning kicks, breaking the old mark of 2,440 set by Gale Sayers of the Chicago Bears in 1966.

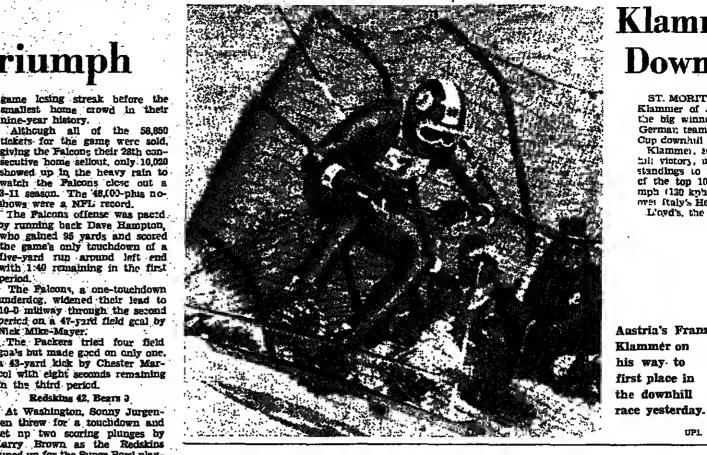

MUNICH, Dec. 15 (Reuters).-

The International Baskethall Federation has imposed penalties on six clubs for contravening European Cup competition rules an FIBA spokesman said here. Soviet teams Dynamo Moscow and Stroltel Kiev and French squad Jeanne d'Arc Vichy were banned from European Cup contests for two years and fined for withdrawing from the Korac Cup after having played matches in this season's competition, the snokesman said.

Partisan Tirana of Albania and the women's team from Juventus Rome also received two-year bans and fines for lateness in withdrawing from cup competition. The IMC Edinburgh, Scotland, women's team was fined for lateness in registering its applieation to take part in competition, the spokesman said,

Franco Harris, hurled two touchdown passes to lead the AFC Central Division champion Pittsburgh Steelers to a 27-3 victory over Cincinnati.

Klammer Repeats **Downhill Victory**

ST. MORITZ. Switzerland, Dec. 15 (UP1).-Franz Klammer of Austria and Lloyd's of London were the big winners today and the disqualified West German team the big icser in the men's World Ski

Cup downhall race.

Klammer, scoring his second consecutive downtil: victory, increased his lead in the World Cup standings to 23 points and led Austria to seven of the top 10 places, clocking a top speed of 80 mph (130 kph) on his way to a 1.36-second victory over ftaly's Herbert Plank in 1:54.72.

L'oyd's, the London insurance company, beat sn oncoming icg bank by an hour to save 20,000 Swiss francs (\$8,000 dellars) in insurance laid against concellation for bad weather.

But the disp. te over the supersmooth fish-skin suits erupted again when the jury disqualified the West German team for wearing the baoned outfits. The move cost Michael Veith third place Austria's Franz to the race and in the overall standings, and the West German team immediately protested the decision.

> The suits have been banned by the International Ski Federation (FIB) because they are so smooth that, when skiers fall, they continue to slide dangerously due to a lack of friction between the suits and the snow

> > Patches in Front

The suits used by the West German team were an adaptation of the fish-skin, with patches of the smooth material on the front part of the suit only. The West German team said it was cleared by the starting referee, Sepp Sulzberger of Austria.

But American Hank Tauber, director of the U.S. team and the overall referee for the race, dis-qualified the Germans when other teams protested after the race.

Canadian Jim Hunter, the high est placed North American in 12th spot, watched Veith come down among the later starters on television. "Why is he going so fast? Why is be wearing that Goddamned suit? He didn't do anything better than I did, and be is so much faster," Hunter

Klammer survived two nasty

moments on the lower half of the

The West German women's team was on the losing end of a aimilar dispute about the suits last week in Cortina d'Ampezzo, Italy. Its members refused to race when told that the suits were illegal and that they would not be insured. But the Austrian team used the suits—claiming that the decision had been made only half on hour before the race—and won

without disqualification. Velth was doubly unlucky because be had the fastest intermediate time on the top half of the course and might have boped for outright victory if he had not been hampered by the slowing down of conditions on the lower half for the later starters. Recovered in Time

break did not come until lest July, when the licence of Costes was suspended. Another jockey, Robert Laouira, allegedly a middle man between the fixers and July, when the license of Costes jockeys, also was warned off the tracks. Laouira was later caught in a police trap. Then last week the wave of arrests occurrde. They were not all that un-expected but they shook racing

people just the same. In previous betting scandals, the police have gone after the bettors for bending the rules, such as Patrice des Moutis, "Monsieur X," who heat the Tierce for more than 5 million, francs on three occa-Many small bettors admire

"Monsieur X" and be even took credit for stimulating more play on the Tierce. But now that the police are seeking to prove the existence of a crude fix. the racing world is worried that the public might decide to kill "the goose that lays the golden egg" that has made French racing the richest in the world...

Vilas Tops Nastase in 5 Sets

Guillermo Vilas throws away his racquet after his victory.

ters). - Argentinian Guillermo Vilas crowned a great season in Commercial Union Grand Prix tennis tournaments today by defeating Romanian Ilie Nastase for the masters title here. The 22-year-old foiled Nastase's attempt to capture the crown for the fourth successive year, defeating him, 7-6, 6-2, 3-6, 3-6, 6-4, in a three-hour final. It was Vilas's seventh tourna-

ment victory in the Grand Prix series.. On the way to the final, he beat Australian champion John Newcombe, Sweden's Bjorn Borg, New Zealander Onny Parun and Mexican Raul Ramirez. But the 28-year-old Nastase. with his tremendous record in the masters tournament, was

In the final, which Nastase described afterward as "more a game of nerves than e game of tennis." Nastase drew first blood. breaking Vilas's service in the third game. But the Argentinian captured Nastase's delivery in the next game and again in the eighth for a 5-3 lead. Serving tiebreaker. Again Vilas seemed to falter

at the crucial point, losing three points with backhand errors, but he recovered to clinch the set. He was well on top in the second set, which he won, but Nastase got back into the match in the next. After dropping his first service, he broke Vilas in the second and fourth games and went on to take the set, handling the Argentinian's drives well for the first time during some long baseline rallies.

Appearing revitalized after a 10-minute break before the fourth set, Nastase went ahead. with the help of two double faults by Vilas. Nastase kept the pressure on and another double fault by Vilas, followed by a simple backhand error, finally let him through to level the

match at two sets each. Showing coolness and spirit after letting a two-set lead slip away, Vilas broke Nastase's service in the opening game of the deciding set. Another break took him to 4-1 and, though Nastase broke in turn to trail, 2-4, be could make no further impression

Three of Pittsburgh's front four (in dark jerseys)-Dwight White, Ernie Holmes and Joe Greene-block a field-goal attempt by Cincinnati's Horst Muhlmann, Steelers won. Aging Blanda a Dual Threat Again OAKLAND, Dec. 15 (UPI).-Forty-seven-year-old playoff-bound Oakland Raiders to a 27-23 victory

George Blanda threw a 28-yard touchdown pass and kicked two field goals last night to help the over the Dallas Cowboys.

The Raireds, woh meet the two-time defending Super Bowl champion Miami Dolphins next Saturday in the AFC playoffs, used four quarterbacks in finishing the season at 12-2:

With the Raiders in front, 17-9, Blanda came in

with 5:10 remaining in the third quarter and com-nected with a scoring pass to Cliff Branch to put the game out of reach for the Cowboys. It was the first touchdown pass by Blanda since

the opening game of the 1972 season. The Raiders let Blanda lead two more series and

ne wound up the second with a 35-yard field goal. Blanda, completing 25 years in professional foot-ball, kicked a 31-yard field goal for Oakland's first.

Ken Stabler, the Raiders' No. 1 quarterback, only played in the first half, but completed 11 of 17 passes for 131 yards and two touchdowns. Stabler threw nine yards to Fred Biletnikoff and

14 yards to Clarence Davis to finish the season with 26 touchdown passes. The Cowboys, missing the playoffs for the first

time in the last nine years, finished the season at 8-6. Their first nine points came on a fumble recovery in the end zone by Drew Pearson and a safety while rookie running back Doug Dennison Ecored on runs of one and two yards in the second · Vikings 35, Chiefs 15

At Kansas City, Fran Tarkenton threw two touchdown passes and Bob Berry added two more in the second half, leading NFC Central champion Minnesota to a 35-15 victory over Kansas City. The victory sent the Vikings into the playoffs

with a 10-4 record, while the Chiefs finished their most miserable season ever at 5-9 A crowd of 35,480 watched in chilly temperatures. A total of 36,934 ticket-holders stayed away, which

uarrowly missed the no-show record of 40,202 set at Atlanta Dec. 1 Steelers 27. Bengals 3 At Pittsburgh, Terry Bradshaw, with spectacular

Weeping With Nixon

By Russell Baker

NEW YORK.—Although Jesus self out of the Democratic wept, American politicians do not. When one of them violates the protocol, the event is so extracrdinary that newspapers report it on front pages and television records it with the gravity due mysterious

firehalls in the sky and diabolism in city hall. Thus, John Ehrlichman's tears on the witness stand Washington Ιu were treated as a major national cccurrence last nsei: and will probably be remembered by the

multitude long after other details of the Watergate trial have been

Although other public men may have wept publicly over the last 25 years, I can remember only two. Both of them, curiously or not, were associated with the career of Richard Nixon, which gives Nixon a monopoly on politi-cal tears in the modern age. The first of course was Nixon.

who wept publicly on the shoulder of the late Sen. William Knowland in 1952 There had been the slush-fund scandal in the middle of the Eisenhower campaign. Nixon, under orders from the general to prove himself "clean as a hound's tooth," had delivered the Checkers speech which brought millions in the television audience close to tears, and the general had pronounced him "my

On hearing the news, Nixon fell against Knowland's lapel and wept. There are pictures of it. his uld acting coach at Whittier Coilege, upon seeing them, is said to have boasted, "I taught him how to do that."

The next public weep was Sen. Edmund Muskie's, executed cutside the plant of the Manchester Union-Leader during the New Hampshire primary of 1972. As with the poet-Checkers crying, the Muskie tears also represented political progress for Nixon, for it was widely assumed that the voters would never telerate a presidential candidate who had tears to shed and that Muskie had, therefore, cried him-

U.S Aims at Hormone Used in Diet Clinics WASHINGTON, Dec. 15 (AP).

-The Food and Drug Administration said last week that a drug produced from the urine of pregnant women will be required to beer a label saying that it's worthless for weight loss.

Expressing concern about the growing use of the hormone in weight-reducing clinics around the country, the FDA said there is no evidence that it is effective in treating fat people.

nomination.

This proved correct. Muskie, who had been running ahead of Nixon in the popularity polls at the end of 1971, faded like an old print by springtime, leaving Nixon to feed upon the luckless McGovern.

There is a small irony in Ehrlichman's tears, for the Watergate confidence game in which he is involved was a part with the political dirty-tricks operations which drove Muskie to destruction-by-tears in New Hampshire. The mechanics by which the White House unloosed the Muskie tear ducts seem to have heen masterminded cy Charles Colson, but we may reasonably assume that Ebrlichman smiled as happily as his fellow White House pranksters upon learning that the fatal tears had flowed in the New England snow.

Did Muskle smile privately this week at the news of Ehrlichman's tears? He would surely not admit to it, but he would be less than human if he did not take satisfaction from the mild biblical justice of extracting a tear for a tear.

The more troublesome question s why the occasional shedding of tears by public men is such an astonishing event that it commands headlines and destroye careers? If Jesus could weep, why not Muskie?

The aggressive American temperament would naturally be uneasy with leaders who governed on floods of tears, hut an occasional cry would seem to suggest a becoming sensitivity in a man, which ought to make him more attractive, not less so, for the brutish work of the presi-

One of the most skilled public weepers of the modern age was Winston Churchill, an American idol. I once saw the old man weep ostentatiously in the House of Commons during a speech describing the devastation humanity would suffer in a nuclear war, and the House was almost reverential in its silence before the spectacle.

An English politician to whom described this remarkable and un-American performance repli-"Oh, Winston does that crying business every time he talks about the bomb. He can turn it on and off." Somewhere in England, I sup-

pose, there was an old drama coach who said, "I taught him how to do that," but it doesn't matter. For Churchill, the shilite to shed a few tears on a large occasion was a manly attribute. Small hoys are taught that boys don't cry, but tears on a big occasion are entirely fitting for a big man.

Perhaps Americans prefer to be led by big boys.

Newsmen in London were shown a sonar photograph of plane wreckage in the English Channel 200 feet under water, 12 1/2 miles southof Dymchurch, a town on the coast of Kent and on the route that Miller might have taken during the wartime flight.

Continuing Search For Glenn Miller

Glenn Miller before he joined the Army.

DARIS (IHT).—Unlike Icarus, whose doom was implanted in his character, Glenn Miller never deviated from his flight plan, before or after he went into uniform. "I'd been having a little late party at my flat," the British showman Jack Hylton recalled a while back, "and Glenn was one of the boys who dropped hy." Later they got a breath of air together outside Hylton's London apartment. Hylton said, "He looked up in the cold night

sky and said, 'Well, Jack, it'll soon he over now.'" This was late in 1944, and it was World War II that Miller was talking about. A short time afterward on Dec. 15, 1944 - Miller, who was then a major in the U.S. Air Force, climbed aboard an unarmed, single-engine Norseman plane, with two companions, for a flight to Paris. He was scheduled to lead his current big band—the 68-man American Air Force Orchestra -in a Christmas Day concert tor : GI andience. Paris had

Jack Hylton was one of the last people to see him alive, "-r Miller, of course, never got here. Neither the plane nor its occupants have ever been found. In the 30 years since that last flight, a Glenn Miller cult of arresting proportions has developed, centering in England, where there is a

been liberated that summer but

the war in Europe was not

Glenn Miller Society with 2,000 members. One of the most ardent Keepers of the Flame there is an export sales manager named John Edwards. 4 years old when Miller died.

Edwards, who pilots a light plane in his spare time, is convinced that he has found his hero's last" resting place. In July he showed newsmen in London a sonar photograph of plane wreckage in the English Channel 200 feet under water 12 1/2 miles southeast of Dymchurch, a town on the coast

happened, any official admission would be unlikely. Nonetheless, some embarrassment may be in store—if the wreckage off Dymchurch is ever brought to the surface it should not he difficult to learn, even after 30 years of immersion, whether the plane was shot down and

if so by which side. Miller's abrupt exit ended a career that had taken him to show business heights in remarkably short time-he had organized his first band only seven years before in 1937. For

IRVING-MARDER

of Kent, and on the route that Miller might have taken during the wartime flight. Edwards said that the wreck "answers the description of Miller's Norseman plane and it is in the right position." He hopes that he and other members of the Miller society in Britain can have the plane raised in the coming year, so that it canhe identified positively. Last week Edwards flew over the site in a single-engine Cherokee-120 and dipped his wings in an airman's sainte.

His theory is that Miller's plane crashed in the Channel because of "carburetor icing." but there is a darker theorythat it may have been shot down by an Allied fighter pilot who mistook it for an enemy plane. There is a consensus that if this had indeed the generation born between the wars-those, say, who were in high school or entering college at the end of the 1930s the mention of Miller often taps a deep well of memories.

Though the Miller sound could strike one as pretty square even then-in contrast to that of, say, Goodman or Ellington—it had a peculiarly strong emotional pull, possibly to the fact that a new World War, after which nothing would be the same, was clearly about to hegin.

Yet at Meadowbrook, at the Glen Island Casino in New Rochelle, in broadcas's, on records and above all on juke boxes, Miller tunes such as "Little Brown Jug," "In the Mood," "Moonlight Serenade" and "String of Pearls" seemed

to fill all the existing air space. "Funky" was a word not yet current, but the band'e singers Tex Beneke, Marion Hutton, Ray Eberle had already found the style.

Lille himself was a man apart, a redoubtable trombonist who also brought the rare quality of discipline to a profession whose folklore tends to move in an opposite direction. A top arranger, for the Dorsey brothers and for Ray Noble among other hand leaders a first-rate soloist, he was unusually well prepared for the big time when, at the age of 33, he launched the first group of his own. Jazz critics have consistently

put Miller down-refused; in son a cases, even to conde to putting him down and yet there is evidence that his anpeal is by no means limited to the incipient senior citizen, dropping a furtive tear in his Scotch as he daydreams about the senior prom of 1940 at the Glen Island Casino, The "posthumous" Glenn Miller orchestras, the slightly macabre groups led by Tex Beneke, Buddy De Franco, and Ray Mc-Kinley have consistently played to sold-out houses at London's Royal Albert Hall and in other countries. · Nostalgia has an chylous role, and so does the For the anti-rock hacklash. English, it's probably more complicated than that, How could they give up on Glenn Miller when they can't get-enough of Vera Lynn singing "We'll Meet Again"?

Austrialian Punter Could Kick Himself

In far-off Sydney, Eddie Birch-ley bet \$117,500 on Danish Dancer a two-year-old-filly, to win a race Saturday, then watched the horse run a close second.

Bookmakers said Birchley, a retired fireman, was hardly ruffled He is known for regularly betting tens of thousands of dollars at tracks throughout eastern Australia.

The \$117,600 bet is believed to be the largest recorded in Austra. lia. The previous higgest recorded bet was \$112,000 on a horse race five years ago.

It's only nickels and dimes after that, but in Hartford, Conn. Ferdinand and Theresa Perron got a refund of \$2,874.63 after finding that for 14 years they had paid double for electricity used on their second floor.

A Hartford Electric Light Co. tesmen said that an electrician recently discovered that the Perrons' meter was wired incorrectly.

They were very, very nice, Mrs. Perron said of the company. "But," she added, "somehow, somewhere, somebody goofed."

All is not well hetween what Reuters characterizes as "the king and queen of U.S. tennis." In Fort Lauderdale, Fla., Chris Evert, 19, said that she and Jimmy

iors "have no plans in the

near future to get married.". Miss Evert did not say that her engagement to the 22-year-old Connors, announced several months ago, had been formally broken off. But, referring to their conflicting tennis schedules, she said: "I don't know when would get to see each other."

Miss Evert was named the top woman player by the U.S. Lawn Tennis Association last week. Connors is the top-ranked male

After living for the last 20 years in Washington, part of the time as writer of the "Observer" column (see other side of this page) Russell Baker has moved to New York and from now on will turn out his column there.

Asked why he had left the rel-ative peace and quiet of Wath-ington for New York, Baker replied: 'I missed combat in World War II, and I didn't get to see any action in Korea or Victiman and I wanted to have something to tell my grandchildren. 大きな 一本 一本 というし Mail Call: From East Germany
